

IMPORTING UPDATED COMPLIANCE CHECKS

The following steps will illustrate how to perform the import of the updated Compliance Checks in *the purge and replace* mode. The updates are in two parts Compliance Checks, and Snippets.

Step 1. **Download** the compliance checks and snippets from the NTIA web site to a folder on your hard drive. We are using the folder **C:\Downloads**.

Step 1. **Click** the **Import** button.

The **Import** window is displayed. (This illustration uses the same default folders that were shown during the training class. You may have loaded the EL-CID program using a different path name. You should use the EL-CID data path name you gave when you loaded your EL-CID software.)

Step 2. **Click** the **browse** button to select the file to import. The folder we are using is **C:\Downloads**. **Highlight** the compliance checks *.cid file you downloaded in step 1 and then **click Open**.

The **Import** window displays the selection.

Step 3. **Click Import.** The **File Description** window is displayed.

Step 4. **Click OK.** The **Purge/Replace on Import** window is displayed.

Step 5. **Click Yes.** The **Progress** window is briefly displayed and then disappears.

Step 6. Repeat the process, but this time choose to import the snippets file you downloaded in step 1.
