

# USABILITY ROUNDUP

Morgan Reed | ACT

NOOR BLAFKIN

6 lbs 12 oz

Does not (currently) have a Social Media  
page or twitter handle.

# THINGS AGREED TO

- How to Display Parenthetical Text – next to the bold, layered, hover-over, etc.
- Design Concepts – straight text, text+ icons, etc.
- How to Display Data Elements NOT Collected - "No", grayed out, unchecked, etc.
- Testing the display of specific design implementations of the code– ACT, Privacy Groups, TRUSTe, ESRB, etc.

# THINGS NOT AGREED TO

- Testing terms and parenthetical text to ensure consumers understand it.
- We might want to clarify that “Design Concepts” also include a layered approach.
- Testing displays showing data elements collected and uncollected vs. displays that only show data collected for user comprehension.
- What to do with the results? Do they effect the document, or are they simply part of developer implementation guide, or best practices, etc?
