

Broadband USA Applications Database

Applicant Name: California Broadband Cooperative, Inc

Public Notice Submissions

-----**Service Area:** Digital 395

Submitter: Mediacom Communications Corporation

Comment: A large number of households in applicant's proposed service area are currently served by Mediacom. Broadband speeds well in excess of the minimum broadband speeds set forth in the NOFA are currently available within the applicant's proposed service area. For its part, Mediacom advertises and provides broadband services within the proposed service area at speeds up to 20 Mbps.

Submitter: Clear Wave Cable

Comment: Our company is in the process of creating as builds to upgrade our existing cable plant to support broadband of up to 20 Mbps. As a small business, it would be detrimental to our company if the federal government were to supplement another initiative in our existing service area.

Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink and its competitors already offer robust broadband service within the mapped area of the applicant's proposed funded service area and that this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the "Existing Broadband Subscribers" section of this response; (3) a summary of the vendor and methodology used for estimating competitive-service subscribers in the mapped area; (4) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (5) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.
