

Broadband USA Applications Database

Applicant Name: Extreme Copper, Inc.

Public Notice Submissions

-----**Service Area:** Unincorporated West Marin County

Submitter: Horizon Cable TV, Inc.

Comment: This applicant does not appear to be a legitimate service provider and is applying for funds to serve an area already largely served by Horizon Cable, Comcast and AT&T. The proposed fiber line to serve the two "unserved" areas runs through our service area where we already provide broadband service with broadband transmission speeds of at least 3 Mbps downstream. It is difficult to respond to this application because it lists its service area as Unincorporated West Marin County (Horizon service area), but then maps mostly an area that is not unserved, not completely in West Marin and well served already by other providers. Funding this request is not the best way to extend service to unserved residents in the area, and in fact does not even cover most unserved areas. Funding this request would be a misuse of taxpayer money. This application does not meet the criterion, or match the intent, of the Broadband Stimulus Program.
