

Broadband USA Applications Database

Applicant Name: X-Press Net, Inc.

Public Notice Submissions

-----**Service Area:** Stecker - Washita

Submitter: Utopian Wireless Corporation

Comment: Proprietary data regarding actual service provider broadband penetration in the proposed service area for this application demonstrates the area is already served by broadband options and therefore this application is ineligible for funding pursuant to the requirements of the Broadband Initiatives Program (BIP) and Broadband Technologies Opportunities Program (BTOP).

-----**Service Area:** Cookietown - Tillman

Submitter: Pioneer Telephone Cooperative

Comment: Pioneer Telephone Cooperative, Inc. through its subsidiary Pioneer Long Distance, Inc. (PLDI), has been offering broadband speed data service to subscribers for over 10 years. The area applied for by the ARRA applicant, which falls within the telephone exchange boundary is served with high speed internet broadband service. PLDI also offers IPTV service to its subscribers in the towns using the Pioneer's broadband plant.

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers'

currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Utopian Wireless

Comment: Proprietary data regarding actual service provider broadband penetration in the proposed service area for this application demonstrates the area is already served by broadband options and therefore this application is ineligible for funding pursuant to the requirements of the Broadband Initiatives Program (BIP) and Broadband Technologies Opportunities Program (BTOP).

-----**Service Area:** New Cordell - Custer

Submitter: Cable One, Inc.

Comment: X-Press Net, Inc. Custer County, Clinton, Oklahoma and surrounding areas.

Cable One, Inc. is a multi-system broadband provider operating in 19 states. Cable One offers residential broadband service with speeds up to 10 MB and customizable commercial solutions with flexible bandwidth offerings from 5Mbps to 1 Gbps. By November 1, 2009, the majority of Cable One systems will also be offering 12 Mb residential broadband service with a 20 MB boost. Cable One provides its subscribers with quality service offerings at competitive rates. Cable One expends substantial capital and resources to ensure that customers enjoy the latest technology and the highest standards of customer service, and has made its customers and its communities its first priority.

Please refer to our supporting documentation and comments that establish that Cable One already operates in census tract(s) encompassing or included in Applicant's Proposed Funded Service Area. The uploaded document includes maps showing census tracts and homes passed for each the applicable systems, current advertisements for residential and commercial broadband offerings, and subscriber data by census tract.

Cable one's current broadband service offerings are as follows:

Residential:

Economy, Speed (Down/up) - 1.5 Mb/150 kbps, Service Rate - \$20.00

Standard , Speed (Down/up) - 5 Mb/500 kbps, Service Rate - \$43.00

Premium, Speed (Down/up) - 10 Mb/1 Mb, Service Rate - \$53.00

Commercial:

Economy, Speed (Down/up) - 5 Mb/1.0 Mb, Service Rate - \$69.65

Standard, Speed (Down/up) - 10.0 Mb/1.0 Mb, Service Rate - \$85.95

Premium, Speed (Down/up) - 12.0 Mb/1.5 Mb, Service Rate - \$99.95

Ultra, Speed (Down/up) - 15.0 Mb/2.0 Mb, Service Rate - \$199.95

Enterprise Plus, Speed (Down/up) - 20.0 Mb/2.5 Mb, Service Rate - \$299.95

Discounted bundles and promotional pricing are also available.

Submitter: Utopian Wireless Corporation

Comment: Proprietary data regarding actual service provider broadband penetration in the proposed service area for this application demonstrates the area is already served by broadband options and therefore this application is ineligible for funding pursuant to the requirements of the Broadband Initiatives Program (BIP) and Broadband Technologies Opportunities Program (BTOP).

Submitter: Pioneer Telephone Cooperative

Comment: Pioneer Telephone Cooperative, Inc. through its subsidiary Pioneer Long Distance, Inc. (PLDI), has been offering broadband speed data service to subscribers for over 10 years. The area applied for by the ARRA applicant, which falls within the telephone exchange boundary is served with high speed internet broadband service.

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

AT&T has attempted to use the available manual mapping tool, to the best of its ability, to approximately depict its combined wireline and 3G mobile broadband service area footprint overlaid on the Applicant's proposed funded service area.

Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink and its competitors already offer robust broadband service within the mapped area of the applicant's proposed funded service area and that this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the "Existing Broadband Subscribers" section of this response; (3) a summary of the vendor and methodology used for estimating competitive-service subscribers in the mapped area; (4) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (5) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----**Service Area:** Stecker - Comanche

Submitter: Utopian Wireless Corporation

Comment: Proprietary data regarding actual service provider broadband penetration in the proposed service area for this application demonstrates the area is already served by broadband options and therefore this application is ineligible for funding pursuant to the requirements of the Broadband Initiatives Program (BIP) and Broadband Technologies Opportunities Program (BTOP).

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Wichita Online Inc.

Comment: Wichita Online (WOI) currently provides a wide array of broadband offerings within the proposed funded service area. WOI has offered broadband services in excess of the 3 MB bandwidth requirement as set forth in the ARRA, NOFA and BIP/BTOP guidelines, all prior to the ARRA approval. WOI's service area already provides for "sufficient access to broadband service to facilitate rural economic development", as well as allows for choice of service providers through competing with Local Exchange Carriers, and allows for leasing of services through our own facilities. The proposed funded service area already provides for not only broadband service through WOI, but several ILEC's, Cable companies, and numerous mobile broadband service providers offer several choice to the subscriber. WOI's opinion of the proposed funded service area is that of excess spending where funds could be better used in other portions of the country to deploy broadband service in accordance with the ARRA, NOFA and BIP/BTOP programs. Through funding the proposed service area, excessive competition will be created for all, which may create a short term economic boost, but have severe long term ramifications which may force service providers out of business.

Submitter: Windstream

Comment: Windstream's data strongly suggest that the proposed funded service area likely does not qualify as an unserved area. Windstream offers facilities-based, terrestrial broadband service at advertised speeds of greater than 768 kbps downstream and 200 kbps upstream to some of the households within the proposed funded service area, and such households can readily subscribe to Windstream's broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given

this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as unserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than \$200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “unserved area” as follows: “Unserved area means a proposed funded service area, composed of one or more contiguous census blocks, where at least 90 percent of households in the proposed funded service area lack access to facilities-based, terrestrial broadband service, either fixed or mobile, at the minimum broadband transmission speed (set forth in the definition of broadband above). A household has access to broadband service if the household can readily subscribe to that service upon request.”

-----**Service Area:** New Cordell - Caddo

Submitter: Utopian Wireless Corporation

Comment: Proprietary data regarding actual service provider broadband penetration in the proposed service area for this application demonstrates the area is already served by broadband options and therefore this application is ineligible for funding pursuant to the requirements of the Broadband Initiatives Program (BIP) and Broadband Technologies Opportunities Program (BTOP).

Submitter: Carnegie Telephone Company

Comment: Carnegie Telephone Company provides DSL to 100%Z of the Carnegie and Alfalfa exchanges at speeds of at least 3mbps. The subscribership of the areas is greater than 40% of the households.

-----**Service Area:** Stecker - Kiowa

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

-----**Service Area:** New Cordell - Beckham

Submitter: Cable One, Inc.

Comment: Cable One, Inc. is a multi-system broadband provider operating in 19 states. Cable One offers residential broadband service with speeds up to 10 MB and customizable commercial solutions with flexible bandwidth offerings from 5Mbps to 1 Gbps. By November 1, 2009, the majority of Cable One systems will also be offering 12 Mb residential broadband service with a 20 MB boost. Submitter: Utopian Wireless Corporation

Comment: Proprietary data regarding actual service provider broadband penetration in the proposed service area for this application demonstrates the area is already served by broadband options and therefore this application is ineligible for funding pursuant to the requirements of the Broadband Initiatives Program (BIP) and Broadband Technologies Opportunities Program (BTOP).

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

AT&T has attempted to use the available manual mapping tool, to the best of its ability, to approximately depict its combined wireline and 3G mobile broadband service area footprint overlaid on the Applicant's proposed funded service area.

Submitter: Windstream

Comment: Windstream's data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream's broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than \$200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an "underserved area" as follows: "Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects- Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for

last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

-----**Service Area:** New Cordell - Washita

Submitter: Cable One, Inc.
