

Broadband USA Applications Database

Applicant Name: Alpena Public School District

Public Notice Submissions

-----**Service Area:** Alpena Regional Fiber Consortium

Submitter: Custom Software, Inc. dba/M-33 Access

Comment: We are a wireless ISP and DSL provider offering services to Northeastern Michigan Communities including those in Alpena and Alcona Counties. While certain applications submitted in this program create an unfair level of competition if thier applications are approved, this is not the case here. The Alpena project, while it builds into our current and proposed service areas will be a positive addition to our network allowing us redundant paths through out both counties.

Submitter: Charter Communications

Comment: Charter Communications ('Charter'), a broadband service provider, has invested capital to provide a full range of Broadband services, including High Speed Internet services, in this service area. The applicant's request in the proposed under-served service area would create an overlap in Charter's service area. Charter's response includes the necessary information to validate the overlapping condition as a result of this applicant's request.
