

Broadband USA Applications Database

Applicant Name: Voice Runner, Inc.

Public Notice Submissions

-----**Service Area:** Waller

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Comcast Cable

Comment: Attached is a summary of the Comcast Cable homes passed, subscriber and advertising information related to the service areas encompassed by this application.

Submitter: Consolidated Communications

Comment: Consolidated Communications serves as a rural incumbent local exchange carrier (ILEC) in the proposed funded service area defined by this applicant. As such, 98% of the households that are within Consolidated's ILEC footprint in the proposed funded service area have access to Consolidated's facilities-based terrestrial broadband service as defined in the Notice of Funding Availability (NOFA). In addition to Consolidated, the proposed funded service area also has access to broadband service as defined in the NOFA through 7 other providers. Furthermore, as evidenced by the materials provided with this submission, Consolidated advertises broadband services of 3 Mbps and higher in the proposed funded service area. Therefore, the applicant's classification of this proposed serving territory as "underserved" is completely unjustified.

-----**Service Area:** Katy Area

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Comcast Cable

Comment: Attached is a summary of the Comcast Cable homes passed, subscriber and advertising information related to the service areas encompassed by this application.

Submitter: Consolidated Communications

Comment: Consolidated Communications serves as a rural incumbent local exchange carrier (ILEC) in the proposed funded service area defined by this applicant. As such, 99% of the households that are within Consolidated's ILEC footprint in the proposed funded service area have access to Consolidated's facilities-based terrestrial broadband service as defined in the Notice of Funding Availability (NOFA). In addition to Consolidated, the proposed funded service area also has access to broadband service as defined in the NOFA through 7 other providers. Furthermore, as evidenced by the materials provided with this submission, Consolidated advertises broadband services of 3 Mbps and higher in the proposed funded service area. Therefore, the applicant's classification of this proposed serving territory as "underserved" is completely unjustified.

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than \$200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects- Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

-----**Service Area:** Conroe

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Comcast Cable

Comment: Attached is a summary of the Comcast Cable homes passed, subscriber and advertising information related to the service areas encompassed by this application.

Submitter: Consolidated Communications

Comment: Consolidated Communications serves as a rural incumbent local exchange carrier (ILEC) in the proposed funded service area defined by this applicant. As such, 99% of the households that are within Consolidated's ILEC footprint in the proposed funded service area have access to Consolidated's facilities-based terrestrial broadband service as defined in the Notice of Funding Availability (NOFA). In addition to Consolidated, the proposed funded service area also has access to broadband service as defined in the NOFA through 8 other providers. Furthermore, as evidenced by the materials provided with this submission, Consolidated advertises broadband services of 3 Mbps and higher in the proposed funded service area. Therefore, the applicant's classification of this proposed serving territory as "underserved" is completely unjustified.

Submitter: CHARTER COMMUNICATIONS

Comment: Charter Communications ('Charter'), a broadband service provider, has invested capital to provide a full range of Broadband services, including High Speed Internet services, in this service area. The applicant's request in the proposed under-served service area would create an overlap in Charter's service area. Charter's response includes the necessary information to validate the overlapping condition as a result of this applicant's request.
