

Broadband USA Applications Database

Applicant Name: Cinergy MetroNet

Public Notice Submissions

-----**Service Area:** Marion

Submitter: Bright House Networks, LLC

Comment: In support of NTIA and RUS' efforts to optimize the distribution of the scarce resources available under the ARRA Broadband NOFA, Bright House Networks is providing additional data related to this Applicant's planned service areas. This application includes service areas which are not underserved

-----**Service Area:** Terre Haute

Submitter: Avenue Broadband Communications, Inc.

Comment: Avenue began providing 10 Mbps and 3 Mbps to this Service Area earlier this year. Take rates have been very strong. Time Warner, Verizon, and At&t also provide high speed internet service to this Service Area at advertised speeds of at least 3 Mbps. Between Time Warner, Verizon, At&t, and Avenue, penetrations levels for this Service Area exceed 40% of homes passed.

Submitter: Time Warner Cable

Comment: As shown in the attached map and exhibit, TWC currently provides broadband Internet access service in the Proposed Funded Service Area. In addition, we advertise service of speeds above 3 Mbps throughout this service area. We pass over 50% of households, and either (1) have actual broadband subscribership of over 40% of the households in these census blocks or (2) the combined broadband subscribership of the wireline broadband providers (including TWC) in these census blocks is reasonably likely to exceed 40%. Therefore, that portion of the proposed funded service area that overlaps Respondent's service area reflected in this response is neither "unserved" or "underserved."
