

Broadband USA Applications Database

Applicant Name: Fresno County Superintendent of Schools

Public Notice Submissions

-----**Service Area:** Fresno County

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Kerman Telephone Company, dba Sebastian

Comment: Kerman Telephone, dba, Sebastian, is challenging the applications for ARRA funding for the Kerman Telephone exchange. The Kerman telephone exchange exceeds the federal NTIA/RUS unserved and underserved definition. Audeamus, a non-regulated affiliate of Sebastian launched high-speed Internet service back in 2000 and has availability to 100% of the customers in our service territory. Sebastian is currently offering the choice of 1.5Mbps, 4 Mbps, and 6Mbps to all our customers. The Kerman Telephone exchange has a broadband penetration rate of 41% and growing. As stated in the NOFA ARRA grants are designed to fund areas where no broadband connectivity exists (i.e are either unserved or underserved). This is not the case in Kerman. Applicants also fail in the requirement to demonstrate that service would not exist absent support from the grant funds – services already exist in this area. As the area served by Sebastian does not meet the required criteria, the request for funding in our service territory for this application should be denied.

Submitter: Ponderosa Cablevision

Comment: Ponderosa has demonstrated that the service area submitted has sufficient subscribership, better than federally mandated broadband speeds and pricing equivalent to less rural areas.
