

## **Broadband USA Applications Database**

**Applicant Name:** Network Computers

**Project Title:** Michigan Thumb Broadband Deployment

**Project Type:** Last Mile Remote

---

### **Executive Summary**

---

Network Computers LLC has developed a wireless broadband network plan that can blanket the entire Southeastern Lower Peninsula area referred to as the "Thumb". This "Thumb" is a vast rural area that is mostly unserved and almost completely underserved by broadband internet access. In this broadband internet service target area there is 174 different communities that as a whole, would have complete broadband internet access. The latest census data for this area indicates 161,563 households in the proposed coverage area. The broadband internet system to be deployed in this area is the best system that can be rapidly brought online throughout this large area.
