Subject: Joint Project Agreement between the United States government and ICANN

"We believe that ICANN is fulfilling its responsibilities under the JPA with the US Department of Commerce. And that as stakeholders we have been a part of fulfilling these responsibilities and the accountability of the organization to its stakeholders."

"We would like to see a transition as long envisaged, and believe, like the Board of ICANN, that the JPA should be concluded, and there should be discussion over the coming months before the JPA concludes to define the final shape of the organization."
