Subject: No broadband access
Date: Tuesday, June 02, 2015 6:42:23 PM

I read an article regarding broadband access in rural America in my electric coop's (Three Rivers Electric) magazine, The Country Circuit. We live 2 1/2 miles from the Jefferson City Missouri city limits and cannot get broadband access. We use our cellphone as a "hotspot" to get metered internet access. Our address is: [REDACTED], Jefferson City, MO 65101. There are 12 homes on our road within 1 mile of each other that don't have broadband access. Thank you for wanting to hear from us on this issue.
Sincerely,
