Subject: Feeling le out with BROADBAND

Where we live there is no broadband, and everytime we ask Big River about it they tell us they have no idea. I have even told them they could use are property for a tower, but that has even gone with no reply. I feel they have got what they said to do done, and tuff everyone else like us. I guess that since they have made you guys happy with what they have done, they don't care about the rest of us, that is the way they make me feel at least. I know the man power is there since unemployment is still high here in Missouri, so we are left to figure that its them. And yes faster Internet is critical to us Country People, are kids do need it for education purposes.
