Subject: rural broadband

I am in a rural district where Embarq controls the phone lines. I only live 1/2 mile from my closest neighbor with DSL internet access. 15 years ago, I asked how it was fair for my neighbors to have internet access, but not me. I said, if I can't get internet, turn off my home phone. They didn't have any problem turning off my phone. I don't understand how it is so unfair???
