# 2305-2310 MHz

### **1. Introduction**

Federal usage of the 2305-2310 MHz band by the Department of Defense is minimal and confined to a few locations, and all operations are conducted on a non-interference basis.

## 2. Allocations

### 2a. Allocations Table

The frequency allocations table shown below is extracted from the Manual of Regulations and Procedures for Federal Radio Frequency Management, Chapter 4 – Allocations, Allotments and Plans.

### Table of Frequency Allocations

### **United States Table**

Federal Table	Non-Federal Table	FCC Rule Part(s)
2305-2310	2305-2310 FIXED MOBILE except aeronautical mobile RADIOLOCATION Amateur	Wireless Communications (27) Amateur Radio (97)
US338 G122	US338	

### **2b. Additional Allocations Table Information**

**G122** In the bands 2300-2310 MHz, 2395-2400 MHz, 2400-2417 MHz, and 4940-4990 MHz, Federal operations may be authorized on a non-interference basis to authorized non-Federal operations, and shall not constrain the implementation of any non-Federal operations.

**US338** The following provisions shall apply in the band 2305-2320 MHz:

(a) In the sub-band 2305-2310 MHz, space-to-Earth operations are prohibited.

(b) Within 145 km of Goldstone, CA (35° 25' 33" N, 116° 53' 23" W), Wireless Communications Service (WCS) licensees operating base stations in the band 2305-2320 MHz shall, prior to operation of those base stations, achieve a mutually satisfactory coordination agreement with the National Aeronautics and Space Administration (NASA).

NOTE: NASA operates a deep space facility in Goldstone in the band 2290-2300 MHz.

# 3. Federal Agency Use

## **3a. Federal Agency Frequency Assignments Table**

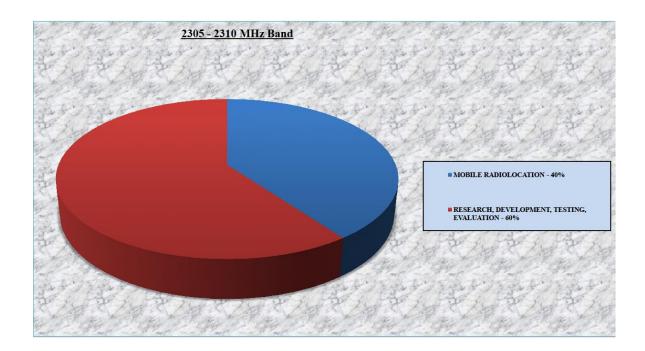

The following table identifies the frequency band, types of allocations, types of applications, and the number of frequency assignments by agency.

2305-2310 MHz Band								
NON-FEDERAL EXCLUSIVE BAND

Federal Frequency Assignment Table

### **3b.** Percentage of Frequency Assignments Chart

The following chart displays the percentage of frequency assignments for the various types of Federal systems operating in the 2305-2310 MHz band.

# 4. Frequency Band Analysis by Application

### 4a. Research, Development, Testing and Evaluation

The Air Force uses this band for research and development, operational tests, tactics and training.

### 4b. Radiolocation

The Navy uses this band for a shipboard radar system located at the Fleet Operational Readiness Accuracy Checksite in Hawaii, which provides measurement of a ship sensor (e.g., shipboard direction finder) to check its navigational accuracy in littoral waters along the coast of Hawaii.

## **5. Planned Use**

The Federal Government use of this band is, and is expected to remain, minimal.
