Title: Characterization of Individual Polymer Molecules Based on Monomer-Interface Interactions

Abstract: A method for sequencing a nucleic acid polymer by (1) providing two separate, adjacent pools of a medium and an interface between the two pools, the interface having a channel so dimensioned as to allow sequential monomer-by-monomer passage from one pool to other pool of only one nucleic acid polymer at a time; (2) placing the nucleic acid polymer to be sequenced in one of the two pools; and (3) taking measurements as each of the nucleotide monomers of the nucleic acid polymer passes through the channel so as to sequence the nucleic acid polymer.

Funding Availability

On December 6, 2001, NTIA announced in the Federal Register, 66 FR 235, that TOP was soliciting grant applications. The Notice of Solicitation of Grant Applications did not announce the amount of available funds because, at the time the Notice was drafted, a final appropriation for TOP was enacted into law. On November 28, 2001, by enactment of Public Law 107–77, TOP was appropriated approximately $12.4 million for grants in FY 2002.

Except to note that funding for TOP is approximately $12.4 million for grants in FY 2002, all other information announced in the Notice of Solicitation of Grant Applications remains in effect. In addition the guidelines for Preparing Applications—Fiscal Year 2002 were unchanged by the appropriations legislation and should now be considered final.

Other Information

For further information on the TOP, please refer to the program’s Notice of Solicitation of Grant Applications, 66 FR 235 (December 6, 2001).
