SUPPLEMENTARY INFORMATION: Recognizing the vital importance of the Internet to U.S. innovation, prosperity, education, and civic and cultural life, the Department of Commerce has made it a top priority to encourage growth of the digital economy and ensure that the Internet remains an open platform for innovation and free expression. As part of the Department’s Digital Economy Agenda, the National Telecommunications and Information Administration (NTIA) initiated an inquiry regarding the Internet of Things (IoT) to review the current technological and policy landscape, which included a Request for Comment on “The Benefits, Challenges, and Potential Roles for the Government in Fostering the Advancement of the Internet of Things.” This workshop will build on the comments received in the Request for Comment, focusing specifically on the potential benefits and challenges of these technologies and what role, if any, the U.S. Government should play in this area. This workshop will help to inform the Department’s forthcoming issue-spotting, agenda-setting green paper on IoT.

NTIA will post a detailed agenda on its Web site, www.ntia.doc.gov/category/internet-things, prior to the meeting. The workshop will consist of a number of panels and speakers that will explore in more depth the obstacles and opportunities raised by commenters on the federal government’s role in IoT deployment. Agenda topics and format are subject to change.

The meeting is open to the public and the press. The meeting is physically accessible to people with disabilities.
