

**DEPARTMENT OF COMMERCE**

**National Telecommunications and Information Administration**

**[Docket No. 160331306–6306–01] RIN 0660–XC024**

**The Benefits, Challenges, and Potential Roles for the Government in Fostering the Advancement of the Internet of Things**

**AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.**

**ACTION: Notice, request for public comment.**

**Jack Kurz – [jackkurz@highspeedsolutions.com](mailto:jackkurz@highspeedsolutions.com)**

In 2011, 3 months after the government spent \$350 million on a National Broadband Map it was labeled a complete failure because it was inaccurate, didn't supply prices from the service providers and the speeds the providers were supplying weren't guaranteed. Today [www.Broadband.gov](http://www.Broadband.gov) just forwards to the FCC web page [www.fcc.gov/general/national-broadband-plan](http://www.fcc.gov/general/national-broadband-plan) and now, Obama's \$7.1 billion broadband stimulus package is referred to as "broadband to nowhere".

**The National Broadband Map: a \$350 million "boondoggle"?**

[www.arstechnica.com/tech-policy/2011/06/national-broadband-map-a-350-million-boondoggle](http://www.arstechnica.com/tech-policy/2011/06/national-broadband-map-a-350-million-boondoggle)

The good news is that I have the answer for our government's boondoggle and it is the following nationwide Ethernet and broadband navigation, mapping and advertising platform. It prices out every type of broadband there is anywhere in the US and it also creates competition between providers which will push prices lower and technology further enhancing the US broadband consumer experience for years to come along with the Internet of Things. It also uses geo keyword SEO domain names (URLs or websites) that allow it to be found everywhere on the web through search or social media. More specifically though it is the answer for the USA to build a Nationwide Ethernet Network correctly and help our telecommunications companies to participate in building a Worldwide Ethernet Network in other countries which will also speed and scale up the Internet of Things.

There are two things I need help with or would like to collaborate with the government with to successfully implement this nationwide and worldwide Ethernet build out plan. Firstly, 1-800-Ethernet | 1-800-384-3763 is owned by a porn company that has illegally hoarded 25% or more of all 800 #'s in the USA and Canada. I have written an informal complaint about this to Acting Chief Rosemary McEnery of the FCC's Market Disputes Resolution and have yet to hear back from them on it so I have attached that letter along

with this one. I understand that under the Telecommunications Act that the Commission has been granted plenary jurisdiction over telecommunications numbering resources in the United States, including toll free #'s and according to the Commission's implementing rules toll free numbers are available on a first come, first-served basis but it is illegal to acquire these numbers if you are specifically hoarding those phone numbers for a single toll free provider and that is what this porn company is doing which you can read about in the below link. 1-800-Ethernet | 1-800-384-3763 is needed in grand scale and measure for advertising, name and product recognition and ease of use for consumer ordering and that is why I am asking for the government's help in acquiring it.

### **Porn Company Has Snatched Up Nearly 25% of 1-800 Numbers in U.S., Canada**

<http://www.foxnews.com/us/2011/04/19/porn-company-amassing-1-800-numbers.html>

Secondly, I filed for the trademark for "Ethernet" which was abandoned by Xerox back in 2013 and I have no idea why I was rejected. The name of my Ethernet Solution's Provider Company is called Ethernet, LLC and the website is [www.Ethernet.GLOBAL](http://www.Ethernet.GLOBAL). I am the only company that calls this type of broadband Ethernet whether it is Ethernet over Copper, Ethernet over Fiber, Ethernet over Cable and/or Power over Ethernet. Verizon has FiOS, AT&T has Uverse, Optimum has Lightpath, Comcast has Gigabit Internet, Charter has Spectrum & etc. Ethernet is my brand and the proper name for the service that is understood and spelled the same way in every language around the world. With collaboration from our government we can trademark "Ethernet" and use that trademark to build a nationwide and worldwide Ethernet network while using my Nationwide Navigation, Mapping, and Advertising Platform to increase competition and the Internet of Things..

### **ETHERNET - Trademark Details**

<https://trademarks.justia.com/859/23/ethernet-85923482.html>

ETHERNET Trademark - Serial Number 85923482 :: Justia ...  
trademarks.justia.com › ... › Categories › Electrical and scientific apparatus

***ETHERNET is a trademark of Ethernet, LLC. Filed in May 4 (2013),  
ETHERNET, namely those that use Broadband and Power***

US connection speeds are currently ranked 17<sup>th</sup> in the world. We can not continue on this same path if we want to be the planet's technology leaders and key driving force for the Internet of Things. Also, the disparity of connection speeds or even just access to the Internet around this country is frightening. States that have not had the resources to build out Ethernet Networks are falling behind economically and at a severe disadvantage to those states that have built one out. Poor states are becoming poorer because they can't attract business. We must act now!!!

Please take a look at my below Nationwide Navigation, Mapping & Advertising Platform that can be found all over search and social media and all of the attached domain names I still have not developed. I hope to be hearing from you soon and welcome any

government assistance or collaboration to help bring the United States connection speeds to the globe's forefront to be a leader in the acceleration of the Internet of Things.

-= Jack

HIGH-SPEED SOLUTIONS  
Nationwide & Global Telecommunications  
Broadband, Networks, Colocation, Cloud & Telephony  
1-800-HIGH-SPEED | 1-800-444-4773

7/27/2015

Acting Chief Rosemary McEnergy  
Market Disputes Resolution  
Division 445 12<sup>th</sup> Street SW  
Washington, DC 20554

Dear Acting Chief Rosemary McEnergy,

I am filing an informal complaint against Primetel who is violating the federal rules of digit hoarding. Over the last 15 years they have hoarded over 30% of all 800 #'s in the United States and Canada. All these numbers redirect callers to erotic sex and chat lines operated by National A-1 Advertising, a company that shares office space with PrimeTel in which it shares ownership and has many of the same people working for or with them. The Federal Communications Commission clearly states and bans toll-free service providers from hoarding digits and "routing multiple toll-free numbers to a single toll-free subscriber" because this is considered hoarding.

Under the Telecommunications Act I do understand that the Commission has been granted plenary jurisdiction over telecommunications numbering resources in the United States, including toll free #'s and according to the Commission's implementing rules toll free numbers are available on a first come, first-served basis but it is illegal to acquire these numbers if you are specifically hoarding those phone numbers for a single toll free provider.

Examples of the Vanity numbers being held by them are 1-800-Metallica, 1-800-Cadillac, 1-800-Minolta, 1-800-Cameras, 1-800-Worship, 1-800-Whirlpool and in my case 1-800-Ethernet, 1-888-Ethernet, 1-877-Ethernet and 1-866-Ethernet. These toll free numbers are clearly numbers that could be used to benefit legitimate enterprises but instead are being redirected to erotic chat lines hoping for astronomically low call back conversions which in the end is a big waste of resources and time for American businesses and consumers.

Lastly, there have been many examples of municipal and emergency response toll free numbers that have been relinquished on mistake because of an administrative slip up or because of non payment and a few days later these toll free numbers were ringing into sex chat lines which to me is unimaginable but it is really happening on a regular basis.

I do hope you can reign in these 800 # abuses in a way that will benefit small and large businesses and the country as a whole in the very near future.

Sincerely,

John J. Kurz (Jack)

cc: Senator Cory A. Booker
