strategies you have employed; planned major activities for the next quarter; and any additional project milestones or information.									
Milestone	activities:								
		emher a	nd December, the State Broadbar	d team was involved	in many aspect	s of moving forward on the m	aior activities/milestones listed in		
During the months of October, November, and December, the State Broadband team was involved in many aspects of moving forward on the major activities/milestones listed in									
the baselin	the Baseline Report.								
During the	October meeting of the		or Stooring Committee the work	group that advises th	a Ctatawida Int	oroporchility Evecutive Comm	aittae on all matters related to		
-	-		ner Steering Committee, the work						
	interoperability around the State, the SWIC and Broadband Outreach Coordinator gave a presentation and updates on the progress of FirstNet and SLIGP. The meeting was attended								
by 25 people from State and local public safety, emergency management, and information technology agencies.									
	We also held our OEC Broadband Workshop in October. 24 people attended and received a great overview of FirstNet and well-researched materials put together specifically for								
Maryland.	Maryland. The number of people who attended is included in the stakeholder conferences.								

During these months we also continued to participate in follow-up meetings with firms that responded to the MACINAC RFI seeking information on how industry experts would deploy the public safety broadband network and ideas for proposing Public Private Partnerships in the FEMA Region. We also worked closely with the MACINAC members to plan for the first MACINAC Public Safety Broadband Workshop to be held in January, 2014. The workshop is a day-and-a-half event with keynote speakers, roundtable discussions, and breakout sessions. About 80 to 100 people are expected to attend. We have been heavily involved in recruiting speakers and inviting participants from the State to attend.

DoIT signed an MOU with the University of Maryland Center for Health and Homeland Security to provide a Broadband Outreach Coordinator and a Broadband Regional Coordinator Team to work in four of the State's five interoperability regions. (This is one contractual vehicle that provides for all these positions). We have had continued discussions on the best way to bring in a final Regional Coordinator for the fifth region which will be either via an MOU or a subrecipient agreement with a local county. We have also discussed the correct contractual vehicles to bring on other contractual staff listed in the budget plan. A major "in-house" milestone was reached in mid-December when DoIT received legislative authority via a budget amendment to spend the grant funds.

With the DoIT Information Technology and GIS team we are evaluating several broadband websites that the State currently deploys in order to develop one "portal" that will serve as the gateway to all things Broadband in the State. FirstNet and the NPSBN will be prominently featured on the site. In the meantime we continue to update our Google website so that stakeholders in the State can track progress and stay updated on the development of FirstNet as well as what the State team is doing.

In early November we distributed the call from the PSAC for "use cases" for Fire, Medical and Law Enforcement Disciplines. We distributed this request to our Broadband Working Group and received 14 unique ideas for app development in the various disciplines. We submitted our ideas to our NCSWIC representative on the PSAC.

The Broadband Outreach Coordinator developed a presentation on FirstNet and what it means for Maryland. 18 people from the Maryland Institute for Emergency Medical Systems Services attended the presentation on November 26. Our "one-page" fact sheet about FirstNet was also handed out to each attendee.

We are continuing to work with the Maryland Center at Bowie State University to develop a program for computer science and engineering students to develop applications for First Responders to use on the Network. Prince George's County public safety officials have agreed to work on the project along with corporate partners, Lockheed Martin, Motorola, Verizon, and APCO. The corporate partners have committed to establishing a pilot broadband network on the campus of Bowie and to provide handheld devices to allow the students to test, develop, and build, in close partnership with first responders, new applications for use on the Network. The Broadband Outreach Coordinator and SWIC are continuing to coordinate these efforts with all of the parties. A draft Letter of Understanding detailing each party's responsibilities is currently being reviewed by the parties. We have held two meetings in this quarter with public safety professionals from Prince George's County and the students. More than 30 public safety professionals have attended and shared their experiences with the students and professors involved in the project. At both meetings the SWIC gave a presentation of FirstNet and what it means for public safety.

11b.If the project team anticipates requesting any changes to the approved Baseline Report in the next quarter, describe those below. Note that any substantive changes to the Baseline Report must be approved by the Department of Commerce before implementation.

Because the proportion of actual match expenditures is less than the proportion of total match expenditures in our total project budget a match proportionality waiver was submitted to NIST in mid-December. To date there has been no reply to the State in response to this waiver request.

We plan to submit a budget modification in the next quarter to increase the SWIC's efforts as SPOC from 10% to 25%. In this quarter we have learned that as the SPOC, he is regularly called up to contribute his expertise for this project and his involvement has substantially increased more than first predicted. As SPOC it is imperative he be involved in all aspects of this project. Given the increase in time, the in-kind match for the SPOC's contribution will increase. Correspondingly we have decreased the amount of match that our site

Page 2 of 5

surveys in Phase 2 are expected to cost.

The budget modification will also see an increase in the funds set aside for the Broadband SME in order to staff that position in year 1 rather than year 2; as well as an increase in the funds for the coordination role played by MACINAC given the complexity of tasks this group will undertake. We also plan to use a contractual vehicle, either an MOU or subrecipient agreement with a local county to hire our last Regional Coordinator.

11c. Provide any other information that would be useful to NTIA as it assesses this project's progress.

This second quarter continues with more administrative in work to make sure the State is set up for the grant. We have completed an MOU to bring on the Broadband Outreach Coordinator and most of the Regional Coordinator team.

11d. Describe any success stories or best practices you have identified. Please be as specific as possible.

12. Personnel

12a. If the project is not fully staffed, describe how any lack of staffing may impact the project's time line and when the project will be fully staffed.

We continue to work on staffing the project as projected in the Baseline/Expenditure plan. The FTE staff (SWIC and DoIT AAG) started working on the SLIGP in the first quarter.

## 12b. Staffing Table

Job Title			%		Change				
SWIC			Serve a	Serve as State Single Point of Contact and responsible for oversight of all SLIGP work					none

According to the Paperwork Reduction Act, as amended, no persons are required to respond to a collection of information unless it displays a currently valid OMB control number. Public reporting burden for this collection of information is estimated to average 10 hours per response for the application process, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Michael Dame, Director, State and Local Implementation Grant Program, Office of Public Safety Communications, National Telecommunications and Information, U.S. Department of Commerce (DOC), 1401 Constitution Avenue, N.W., HCHB, Room 7324, Washington, D.C. 20230.
