

Broadband USA Applications Database

Applicant Name: Education Networks of America, Inc.

Public Notice Submissions

-----**Service Area:** Argos Community Schools

Submitter: CenturyLink

Comment: The proposed service areas are not wholly underserved or unserved.

CenturyLink is submitting data that shows the application's proposed service area is not underserved or unserved, under program guidelines. Accordingly, the application must be denied as ineligible. With limited funding and a large pool of applications, program grants and loans must be directed only to areas that are truly underserved or unserved, as stipulated in the program guidelines.

CenturyLink can certify that its affiliates currently offer broadband service in some or all of the applicant's proposed service areas. We attach a representative sample of areas where the application overlaps our existing broadband deployment. This data is not exhaustive; the application may include other areas also currently served with broadband by CenturyLink or other providers. We will provide additional information on request if that will further assist the agency's review.

CenturyLink also provides data showing broadband availability in local telephone exchanges within the proposed service areas. This includes areas served by CenturyLink and/or other broadband providers. This data further show the applicant would duplicate and overlap existing broadband services in the proposed service areas.

CenturyLink has committed to upgrade and extend broadband.

CenturyLink has an extensive broadband footprint today, and has committed to extend that service even further. As part of its merger commitments to the Federal Communications Commission, CenturyLink committed to offer retail broadband Internet access service to 100% of its broadband eligible access

lines by July 1, 2012. Consequently, virtually no areas served by CenturyTel or Embarq local operating companies, in any state, will be underserved or unserved at the end of three years.

CenturyLink also agreed to meet targets for minimum download speeds. CenturyLink will ensure availability of retail broadband Internet access service with a download speed of 1.5 Mbps to 87% of the broadband eligible access lines by July 1, 2011. It will ensure availability with a download speed of 3 Mbps to 75% of broadband eligible access lines by July 1, 2010, to 78% of broadband eligible lines by July 1, 2011, and to 80% of broadband eligible lines within 3 years of the close date. Nationwide, our average tele-density is 23 customers per square mile. This commitment ensures availability of broadband even to very rural consumers.

The agency should consider the importance of this commitment, as CenturyLink's continuing investment inevitably will make applications that overlap CenturyLink service areas less viable. CenturyLink has proven, industry-leading experience in deploying broadband networks and services using both wireline and wireless technology, and a strong commitment and focus on rural areas. Today, it serves 7 million access lines and 2.1 million broadband customers in 33 states.

Comment: The proposed service areas are not wholly underserved or unserved.

CenturyLink is submitting data that shows the application's proposed service area is not underserved or unserved, under program guidelines. Accordingly, the application must be denied as ineligible. With limited funding and a large pool of applications, program grants and loans must be directed only to areas that are truly underserved or unserved, as stipulated in the program guidelines.

CenturyLink can certify that its affiliates currently offer broadband service in some or all of the applicant's proposed service areas. We attach a representative sample of areas where the application overlaps our existing broadband deployment. This data is not exhaustive; the application may include other areas also currently served with broadband by CenturyLink or other providers. We will provide additional information on request if that will further assist the agency's review.

CenturyLink also provides data showing broadband availability in local telephone exchanges within the proposed service areas. This includes areas served by CenturyLink and/or other broadband providers. This data further show the applicant would duplicate and overlap existing broadband services in the proposed service areas.

CenturyLink has committed to upgrade and extend broadband.

CenturyLink has an extensive broadband footprint today, and has committed to extend that service even further. As part of its merger commitments to the Federal Communications Commission, CenturyLink committed to offer retail broadband Internet access service to 100% of its broadband eligible access lines by July 1, 2012. Consequently, virtually no areas served by CenturyTel or Embarq local operating companies, in any state, will be underserved or unserved at the end of three years.

CenturyLink also agreed to meet targets for minimum download speeds. CenturyLink will ensure availability of retail broadband Internet access service with a download speed of 1.5 Mbps to 87% of the broadband eligible access lines by July 1, 2011. It will ensure availability with a download speed of 3

Mbps to 75% of broadband eligible access lines by July 1, 2010, to 78% of broadband eligible lines by July 1, 2011, and to 80% of broadband eligible lines within 3 years of the close date. Nationwide, our average tele-density is 23 customers per square mile. This commitment ensures availability of broadband even to very rural consumers.

The agency should consider the importance of this commitment, as CenturyLink's continuing investment inevitably will make applications that overlap CenturyLink service areas less viable. CenturyLink has proven, industry-leading experience in deploying broadband networks and services using both wireline and wireless technology, and a strong commitment and focus on rural areas. Today, it serves 7 million access lines and 2.1 million broadband customers in 33 states.

Submitter: Comcast Cable

Comment: Attached is a summary of the Comcast Cable homes passed, subscriber and advertising information related to the service areas encompassed by this application.

-----**Service Area:** Princeton Public Library

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

-----**Service Area:** Central Noble Community School Corporation

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

-----**Service Area:** Hanover Community School Corporation

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Comcast Cable

Comment: Attached is a summary of the Comcast Cable homes passed, subscriber and advertising information related to the service areas encompassed by this application.

-----**Service Area:** Clinton Prairie School Corporation

Submitter: Mulberry Cooperative Telephone

Comment: Education Networks of America, Inc. proposed broadband project overlaps territory served by Mulberry Cooperative Telephone. Mulberry is capable of serving 100% of its customers. This area is currently capable of receiving high speed broadband access at speeds ranging up to 12 mbps down. As such, this area is "SERVED" based on the definitions as established in the Notice of Funds Availability (NOFA). In this public notice response Mulberry is providing; 1) a map of the overlapping area where Mulberry provides broadband services, 2) Mulberry's DSL high speed Internet advertising 3) the number of residential households and business establishments capable of receiving broadband services from Mulberry within our service area, 4) the number of residential households and business establishments subscribing to our broadband, 5) the advertised download and upload speeds and service rates, and 6) comments addressing the existing services offered within the proposed funded service area.

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Comment: Attached is a summary of the Comcast Cable homes passed, subscriber and advertising information related to the service areas encompassed by this application.

Submitter: Geetingsville Telephone Company, Inc.

Comment: The application submitted by Education Networks of America, Inc. contains inaccurate and incomplete information for the proposed funded service area. Geetingsville Telephone Company, Inc. demonstrates that it provides access to broadband services at transmission speeds of up to 12 Mbps to 100% of its members and has a 55% penetration rate within Geetingsville Telephone Company service territory. As such, this area is "SERVED" based on the definitions as established in the Notice of Funds Availability (NOFA). In this public notice response Geetingsville is providing; 1) a map of the overlapping area where Geetingsville provides broadband services, 2) Geetingsville's DSL high speed Internet advertising 3) the number of residential households and business establishments capable of receiving broadband services from Geetingsville within our service area, 4) the number of residential households and business establishments subscribing to our broadband, 5) the advertised download and upload speeds and service rates, and 6) comments addressing the existing services offered within the proposed funded service area.
