Broadband USA Applications Database

Applicant Name: The Computer Works

Public Notice Submissions

-----Service Area: Lonoke County

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink and its competitors already offer robust broadband service within the mapped area of the applicant's proposed funded service area and that this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) a summary of the vendor and methodology used for estimating competitive-service subscribers in the mapped area; (4) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (5) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----Service Area: Searcy County
Submitter: Ritter Communications

Comment: Ritter Communications responds to the filed application of The Computer Works, Searcy County. Ritter, through its affiliate Tri-County Telephone Company, provides access to broadband service to 95% of its St. Joe exchange, a portion of which overlaps portions of The Computer Works PFSA, Searcy County. The Computer Works proposal does not meet the designation of underserved in this area.

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects-Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point
terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile
projects.”

-----Service Area: Faulkner County

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband
footprint to assist in determining whether the applicant's proposed
service area, which may be part of a larger application and project,
satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers'
currently operating in the service area may be needed in order to make
a reasonable analysis or a conclusive determination.

Submitter: Windstream

Comment: Windstream's data strongly suggest that the proposed funded service area likely does not
qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service
(meeting the definition set forth in the Notice of Funds Availability) to some of the households in the
proposed funded service area, and such households can readily subscribe to Windstream's broadband
service upon request. Windstream also has reason to believe that competitive broadband offerings are
available in exchanges overlapping the proposed funded service area. Given this information, agency
officials should further investigate existing broadband offerings within the proposed funded service
area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband
customers in 16 states. Investing more than $200 million in broadband deployment over the last several
years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and
affordable broadband service.
The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink and its competitors already offer robust broadband service within the mapped area of the applicant’s proposed funded service area and that this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) a summary of the vendor and methodology used for estimating competitive-service subscribers in the mapped area; (4) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (5) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

Service Area: Saline County

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband
footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

-----Service Area: Conway County

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

-----Service Area: Stone County

Submitter: Mountain View Telephone Company

Comment: This area is not under served. Mountain View Telephone Company, an existing RUS borrower serving Stone County since 1936 provides broadband at speeds up to and including 10 MBps.
Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

-----Service Area: Van Buren County
Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Arkansas Telephone Company

Comment: In the Clinton, Fairfield Bay, Scotland, and Shirley exchanges - Arkansas Telephone Company objects to the classification of the proposed area being designated as underserved. Arkansas Telephone provides access to consumers of facilities-based broadband transmission speeds of at least 768 kilobits to 100% of the Proposed Funded Service Area. Not only does Arkansas Telephone provide services to this area, but two wireless broadband service providers and a number of cable providers also compete and advertise broadband services of speeds up to and over 5 megabits in the proposed funded service area. Arkansas Telephone believes that, when coupled with the two broadband wireless providers and the cable providers, the penetration rate of broadband access is over 40% in the proposed service area. Arkansas Telephone has invested extensively in the proposed funded service area to bring consumers the latest broadband technologies. Therefore this application should be rejected based on the above statements.

Submitter: Clinton Cable Inc.

Comment: Quitman Cable provides High Speed Internet Service at lower than average prices for speeds over 3Mbps in the most populated area that the applicant says is unserved and/or underserved. If the applicant supplies service to the outbound area that we serve, they have no way of blocking wireless internet service to the areas that we serve. We are planning to expand our service area in the near future, but equipment cost and economic slowdowns have forced us to wait a short time. This applicant receiving funds for this area would not benefit enough homes that do not already have access to over a 3Mbps high speed internet service.

Submitter: Allegiance Communications
Comment: Allegiance Communications (Allegiance) currently provides a wide array of broadband offerings within the proposed funded service area. Allegiance has offered broadband services in excess of the 3 MB bandwidth requirement as set forth in the ARRA, NOFA and BIP/BTOP guidelines, all prior to the ARRA approval. Allegiance’s service area already provides for “sufficient access to broadband service to facilitate rural economic development”, as well as allows for choice of service providers through competing with Local Exchange Carriers, and allows for leasing of services through our own facilities. Allegiance’s opinion of the proposed funded service area is that of excess spending where funds could be better used in other portions of the country to deploy broadband service in accordance with the ARRA, NOFA and BIP/BTOP programs. Through funding the proposed service area, excessive competition will be created for all, which may create a short term economic boost, but have severe long term ramifications which may force service providers out of business.

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per
second ("mbps") downstream in the proposed funded service area; or 3. The rate of broadband
subscribership for the proposed funded service area is 40 percent of households or less. A proposed
funded service area may qualify as underserved for Middle Mile projects if one interconnection point
terminates in a proposed funded service area that qualifies as underserved or underserved for Last Mile
projects.”

-----Service Area:  Independence County

Submitter:  AT&T

Comment:  AT&T is providing data about its wireline and mobile broadband
footprint to assist in determining whether the applicant's proposed
service area, which may be part of a larger application and project,
satisfies the underserved eligibility requirements.

Additional information regarding other broadband service providers'
currently operating in the service area may be needed in order to make
a reasonable analysis or a conclusive determination.

Submitter:  Windstream

Comment:  Windstream's data strongly suggest that the proposed funded service area likely does not
qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service
(meeting the definition set forth in the Notice of Funds Availability) to some of the households in the
proposed funded service area, and such households can readily subscribe to Windstream's broadband
service upon request. Windstream also has reason to believe that competitive broadband offerings are
available in exchanges overlapping the proposed funded service area. Given this information, agency
officials should further investigate existing broadband offerings within the proposed funded service
area, so that officials can be sure that the area, in fact, qualifies as underserved.
Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

-----Service Area: Marion County

Submitter: Yelcot Telephone Co., Inc.

Comment: This area is not under-served. Yelcot, an existing RUS borrower, provides broadband at a variety of speeds up to and including 10 MBps.

Submitter: NATCO Technologies-A Subsidiary of NATCO Comm

Comment: NATCO Technologies objects to the classification of the Buffalo, Big Creek and Bearden township areas of Marion County as underserved. These are in the Flippin exchange and NATCO advertises and provides access to facilities based broadband service at speeds up to 6MB to 80% of the proposed funded service area that is within the Flippin exchange. Not only does NATCO provide service
to this area, but Verizon Wireless, Cingular Wireless and Wildblue high speed satellite also compete and advertise broadband services with speeds up to 5 megabits in the proposed funded service area. When coupled with the two broadband wireless providers and the satellite provider, the penetration rate of broadband access would be over 40% in the South Marion County area. NATCO has invested extensively in the proposed funded service area to bring consumers the latest broadband technologies and this area is fully served. Therefore, this application should be denied for the proposed funding areas that overlap NATCO’s service area.

-----Service Area: Perry County

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant’s proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request.
