

Broadband USA Applications Database

Applicant Name: Copper Valley Wireless, Inc.

_____ **Public Notice Submissions** _____

-----**Service Area:** Cordova

Submitter: Cordova Telephone Cooperative ILEC

Comment: The Copper Valley Wireless proposal is misleading for the following reasons; by definition Cordova is niether unserved or underserved and has two providers continually working to bring faster Internet speeds to Cordova. Copper Valleys proposal is an attempt to have the tax payers fund additional cell sites and cover transport costs back to Valdez from their existing cell sites located in Cordova.
