Applicant Name: WI-VOD Corporation

Public Notice Submissions

Service Area: OK Cherokee Wagoner

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant’s proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Allegiance Communications, LLC

Comment: Allegiance Communications (Allegiance) currently provides a wide array of broadband offerings within the proposed funded service area. Allegiance has offered broadband services in excess of the 3 MB bandwidth requirement as set forth in the ARRA, NOFA and BIP/BTOP guidelines, all prior to the ARRA approval. Allegiance’s service area already provides for “sufficient access to broadband service to facilitate rural economic development”, as well as allows for choice of service providers through competing with Local Exchange Carriers, and allows for leasing of services through our own facilities. Allegiance’s opinion of the proposed funded service area is that of excess spending where funds could be better used in other portions of the country to deploy broadband service in accordance with the ARRA, NOFA and BIP/BTOP programs. Through funding the proposed service area, excessive competition will be created for all, which may create a short term economic boost, but have severe long term ramifications which may force service providers out of business.

Submitter: Windstream
Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink and its competitors already offer robust broadband service within the mapped area of the applicant’s proposed funded service area and that this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we
entered in the “Existing Broadband Subscribers” section of this response; (3) a summary of the vendor and methodology used for estimating competitive-service subscribers in the mapped area; (4) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (5) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----Service Area:  OK Cherokee Rogers

Submitter:  AT&T

Comment:  AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

-----Service Area:  OK Cherokee Tulsa

Submitter:  AT&T

Comment:  AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project,
satisfies the unserved and underserved eligibility requirements.

Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Cox Communications

Comment: Cox Communications, Inc. (Cox) is a broadband communications and entertainment company, providing advanced digital video, Internet, telephone and wireless services over its nationwide IP network. The third-largest U.S. cable TV company, Cox serves over 6.2 million residences and businesses.

Cox operates in hundreds of communities in 18 states and has invested over $16 billion in private capital in its network over the least ten years. Cox provides its customers in Oklahoma with 21st century infrastructure that provides advanced broadband, video and telephone services. More than 99.5 percent of the households in our service areas have access to Cox high-speed Internet, at some of the fastest broadband speeds available in the nation.

Cox supports the goals of the American Recovery and Reinvestment Act to extend broadband to parts of the country that are unserved or underserved. We appreciate the efforts of the Rural Utilities Service and the National Telecommunications and Information Administration in making sure that the limited amount of broadband stimulus funding available under the ARRA is targeted toward those consumers in greatest need, rather than to areas that already have access to broadband service.

To assist your agencies in ensuring that ARRA funds are directed to truly unserved and underserved areas, Cox is providing supplemental information that demonstrates, for the above-referenced application, the following: the location of Cox’s broadband infrastructure; broadband service levels provided; number of customers served; pricing for each service tier; and marketing materials which demonstrate service availability. Consistent with the statutory requirement to expend funds only for projects in eligible areas, we trust that your agencies will use this information -- along with information from other broadband providers -- to obtain a clear picture of service availability in the area covered by the application. We encourage the use of independent due diligence to determine the extent of other broadband service offerings in the proposed funded service area covered by this submission, if other providers fail to submit information prior to the submission deadline.
We request that this data be treated as confidential and proprietary. Much of the information provided with this letter constitutes trade secrets or commercial information that is privileged and confidential and therefore exempt from public disclosure under 5 U.S.C. § 552(b)(4). Cox does not disclose this information to the public, and release of this information could cause competitive harm, by enabling other broadband providers to tailor their business strategies to unfairly compete with Cox.

Thank you for the opportunity to submit this information. We trust that it will be helpful in your analysis, and will inform your final decision concerning the application.

-----Service Area:  OK Cherokee Delaware

Submitter:  Grand Telephone Co. inc.

Comment:  The area in which the applicant WI-VOD Corporation has filed a stimulus application defining an underserved area, a portion of WI-VOD Corporation application area is currently served with Broadband by Grand Telephone. Over the last seven years Grand Telephone has made and maintained significant investments to provide 768 kbps broadband speeds to all establishments in its serving area. Grand Telephone advertises the availability of 3 Mb Broadband Speeds to all establishments within its Jay and Disney exchanges.

Submitter:  Salina Spavinaw Telephone Company, Inc.

Comment:  The area that Salina Spavinaw Telephone Company, Inc. serves is neither underserved or unserved. We have purchased new equipment since June 30, 2009 that will enable our company to serve at least 90% of households in this service area. The service will be downloads of at least 768K and up to 3.0Mbps.

Submitter:  Seneca Goodman and Ozark Telephone Companies

Comment:  Seneca, Goodman, and Ozark Telephone Companies, an RUS/RDUP telecom loan program borrower, currently provides broadband internet service access to all establishments located within
their certificated service areas. The lowest advertised broadband internet service package is 1 Mb downstream with 3 Mb internet service also being advertised. I.P. Video services are available throughout all exchange areas, further demonstrating and utilizing the capacity of the established broadband facilities. The Seneca Goodman and Ozark Telephone Companies have provided dedicated fiber access for broadband service transmission to schools located within their exchange areas, and in 2004 began providing broadband internet access in their certificated exchange areas of rural southwest Missouri, Northwest Arkansas, and Northeast Oklahoma. Currently several fixed broadband facility and nationwide wireless providers are competing for broadband services within the exchange areas of Seneca, Goodman, and Ozark Telephone Companies.

-----Service Area: OK Cherokee Muskogee

Submitter: Cross Wireless L.L.C.

Comment: Cross Wireless, LLC, has been offering broadband speed data service to its subscribers for over 5 years. The area applied for by the ARRA applicant, which falls within the wireless service area is served with high speed internet broadband service.

Submitter: Allegiance Communications, LLC

Comment: Allegiance Communications (Allegiance) currently provides a wide array of broadband offerings within the proposed funded service area. Allegiance has offered broadband services in excess of the 3 MB bandwidth requirement as set forth in the ARRA, NOFA and BIP/BTOP guidelines, all prior to the ARRA approval. Allegiance’s service area already provides for “sufficient access to broadband service to facilitate rural economic development”, as well as allows for choice of service providers through competing with Local Exchange Carriers, and allows for leasing of services through our own facilities. Allegiance’s opinion of the proposed funded service area is that of excess spending where funds could be better used in other portions of the country to deploy broadband service in accordance with the ARRA, NOFA and BIP/BTOP programs. Through funding the proposed service area, excessive competition will be created for all, which may create a short term economic boost, but have severe long term ramifications which may force service providers out of business.

Submitter: Cross Telephone Company LLC

Comment: Cross Telephone Company LLC through its subsidiary, Cross Cable Television, Inc., has been offering broadband speed data service to subscribers for over 5 years. The area applied for by the ARRA
applicant, which falls within the telephone exchange boundary is served with high speed internet broadband service. Cross Cable Television, Inc. also offers IPTV service to its subscribers within the exchanges Cross serves.

Submitter:  Windstream

Comment:  Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects-Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”
Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink and its competitors already offer robust broadband service within the mapped area of the applicant’s proposed funded service area and that this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) a summary of the vendor and methodology used for estimating competitive-service subscribers in the mapped area; (4) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (5) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----Service Area: OK Cherokee Washington

Submitter: Cable One, Inc.

Comment: WI-VOD Corporation Washington County, Bartlesville, Oklahoma and surrounding areas.

Cable One, Inc. is a multi-system broadband provider operating in 19 states. Cable One offers residential broadband service with speeds up to 10 MB and customizable commercial solutions with flexible bandwidth offerings from 5Mbps to 1 Gbps. By November 1, 2009, the majority of Cable One systems will also be offering 12 Mb residential broadband service with a 20 MB boost. Cable One provides its subscribers with quality service offerings at competitive rates. Cable One expends substantial capital and resources to ensure that customers enjoy the latest technology and the highest standards of customer service, and has made its customers and its communities its first priority.

Please refer to our supporting documentation and comments that establish that Cable One already operates in census tract(s) encompassing or included in Applicant’s Proposed Funded Service Area. The uploaded document includes maps showing census tracts and homes passed for each the applicable systems, current advertisements for residential and commercial broadband offerings, and subscriber data by census tract.

Cable one’s current broadband service offerings are as follows:
Residential:

Economy, Speed (Down/up) - 1.5 Mb/150 kbps, Service Rate - $20.00
Standard, Speed (Down/up) - 5 Mb/500 kbps, Service Rate - $43.00
Premium, Speed (Down/up) - 10 Mb/1 Mb, Service Rate - $53.00

Commercial:

Economy, Speed (Down/up) - 5 Mb/1.0 Mb, Service Rate - $69.65
Standard, Speed (Down/up) - 10.0 Mb/1.0 Mb, Service Rate - $85.95
Premium, Speed (Down/up) - 12.0 Mb/1.5 Mb, Service Rate - $99.95
Ultra, Speed (Down/up) - 15.0 Mb/2.0 Mb, Service Rate - $199.95
Enterprise Plus, Speed (Down/up) - 20.0 Mb/2.5 Mb, Service Rate - $299.95

Discounted bundles and promotional pricing are also available.

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

-----Service Area: OK Cherokee Nowata

Submitter: AT&T

Comment: AT&T is providing data about its wireline and mobile broadband footprint to assist in determining whether the applicant's proposed service area, which may be part of a larger application and project, satisfies the unserved and underserved eligibility requirements. Additional information regarding other broadband service providers' currently operating in the service area may be needed in order to make a reasonable analysis or a conclusive determination.

Submitter: Totah Communications, Inc.
Wi-Vod a wireless service provider, with offices in Casa Grande, AZ. In their Wi-Vod Corporation - Nowata ARRA filing, Wi-Vod has incorrectly filed for ARRA funding for areas that include a portion of Totah Communications, Inc.’s (Totah) rural exchange area in Oklahoma. The areas Wi-Vod proposes to serve that covers Totah territory in Oklahoma are Wann, Lenapah and a small portion of Oglesby. Wi-Vod has incorrectly identified the area of Oglesby as underserved and that is wrong. Totah currently serves the entire area of Oglesby with broadband access at speed equal to or in excess of 768 kbps. In addition, Wi-Vod indicates that all of the Wann and Lenapah areas are underserved. Wi-Vod is wrong in their assertion. The exchanges of Wann and Lenapah both only have limited portions that are not already being served with broadband by Totah with speeds equal to or in excess of 768 kbps. In the limited areas in which 768 kbps are not currently provided, Totah is still providing Internet access. Additionally, Totah has requested ARRA funds in order to upgrade those limited areas with speeds equal to or in excess of 3 Mbps.

We oppose Wi-Vod’s blanket filing and their request for funds covering any portion of Oglesby in Oklahoma on the basis that they have incorrectly identified the entire area of Oglesby as underserved which is an incorrect assertion. Likewise Wi-Vod has incorrectly indicated that Wann and Lenapah are underserved in their entirety. We recommend that the Wi-Vod application be rejected.

If you have any questions, or need additional information please do not hesitate to contact us.

Sincerely,

Keith E. Watson

Totah Communications, Inc.

Comment:  The area that Salina Spavinaw Telephone Company, Inc. serves is neither underserved or unserved. We have purchased new equipment since June 30, 2009 that will enable our company to serve at least 90% of households in this service area. The service will be downloads of at least 768K and up to 3.0Mbps.

Submitter:  Windstream

Comment:  Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.
The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

-----Service Area:  OK Cherokee Adair

Submitter:  Salina Spavinaw Telephone Company, Inc.

Comment:  The area that Salina Spavinaw Telephone Company, Inc. serves is neither underserved on unserved. We have purchased new equipment since June 30, 2009 that will enable our company to serve at least 90% of households in this service area. The service will be downloads of at least 768K and up to 3.0Mbps.

Submitter:  Windstream

Comment:  Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.
Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1.
