Applicant Name: Flat Wireless, LLC

Public Notice Submissions

-----Service Area: Big Lake

Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink already offers broadband service within the mapped area of the applicant’s proposed funded service area and that this mapped area is not unserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (4) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----Service Area: Pampa

Submitter: AMA TechTel

Comment: As a Texas service provider serving many rural communities including Claude and Stinnett, Texas for which funds are being requested in this application, we are filing comments to give the determining authority complete information so that they can accurately distribute funds to those areas that are either unserved or underserved as required by the NOFA.

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband
service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.

Submitter: Cable One, Inc.

Comment: Cable One, Inc. is a multi-system broadband provider operating in 19 states. Cable One offers residential broadband service with speeds up to 10 MB and customizable commercial solutions with flexible bandwidth offerings from 5Mbps to 1 Gbps. By November 1, 2009, the majority of Cable One systems will also be offering 12 Mb residential broadband service with a 20 MB boost. Cable One provides its subscribers with quality service offerings at competitive rates. Cable One expends substantial capital and resources to ensure that customers enjoy the latest technology and the highest standards of customer service, and has made its customers and its communities its first priority.
Please refer to our supporting documentation and comments that establish that Cable One already operates in census tract(s) encompassing or included in Applicant’s Proposed Funded Service Area. The uploaded document includes maps showing census tracts and homes passed for each the applicable systems, current advertisements for residential and commercial broadband offerings, and subscriber data by census tract.

Cable one’s current broadband service offerings are as follows:

**Residential:**
- Economy, Speed (Down/up) - 1.5 Mb/150 kbps, Service Rate - $20.00
- Standard, Speed (Down/up) - 5 Mb/500 kbps, Service Rate - $43.00
- Premium, Speed (Down/up) - 10 Mb/1 Mb, Service Rate - $53.00

**Commercial:**
- Economy, Speed (Down/up) - 5 Mb/1.0 Mb, Service Rate - $69.65
- Standard, Speed (Down/up) - 10.0 Mb/1.0 Mb, Service Rate - $85.95
- Premium, Speed (Down/up) - 12.0 Mb/1.5 Mb, Service Rate - $99.95
- Ultra, Speed (Down/up) - 15.0 Mb/2.0 Mb, Service Rate - $199.95
- Enterprise Plus, Speed (Down/up) - 20.0 Mb/2.5 Mb, Service Rate - $299.95

Discounted bundles and promotional pricing are also available.

-----Service Area: Brady
**Submitter:** Central Texas Telephone Cooperative, Inc.

**Comment:** Central Texas Telephone Cooperative, Inc. (Central Texas) is an incumbent broadband provider in McCulloch and Concho Counties, TX, an area covered by Flat Wireless’ Brady broadband stimulus application. Central Texas provides universal broadband coverage to 100% of the potential subscribers in the counties, and it provides broadband service to 8.7% of those potential subscribers. Central Texas has consistently and effectively advertised the availability of broadband Internet access at speeds of 3 Mbs and higher. The combined penetration rate of Central Texas and all other incumbent broadband providers should negate a description of the applicant’s Proposed Service Area as “unserved” or “underserved.”

---

**Submitter:** Suddenlink Communications

**Comment:** Suddenlink already offers robust broadband service within the mapped area of the applicant’s proposed funded service area and we are confident this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (4) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----

**Service Area:** Cross Plains

**Submitter:** windstream

**Comment:** Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an unserved area. Windstream offers facilities-based, terrestrial broadband service at advertised speeds of greater than 768 kbps downstream and 200 kbps upstream to some of the households within the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given
this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as unserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “unserved area” as follows: “Unserved area means a proposed funded service area, composed of one or more contiguous census blocks, where at least 90 percent of households in the proposed funded service area lack access to facilities-based, terrestrial broadband service, either fixed or mobile, at the minimum broadband transmission speed (set forth in the definition of broadband above). A household has access to broadband service if the household can readily subscribe to that service upon request.”

------Service Area:  Sundown

Submitter:  KeyOn Communications

Comment:  KeyOn Communications currently provides access at speeds of at least 768kbps downstream and at least 200kbps upstream to more than 50% of the homes in the designated area.

Submitter:  Windstream

Comment:  Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency
officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

Submitter:  South Plains Telephone Cooperative

Comment:  South Plains Telephone Cooperative serves the Arnett Exchange, a portion of which is included in the proposed funded service area of Flat Wireless. Because the Cooperative provides access to broadband service to all customers throughout the exchange, it exceeds 50% of availability to households and businesses and therefore the area does not meet the criteria for underserved.

-----Service Area:  Anson
Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink already offers broadband service within the mapped area of the applicant’s proposed funded service area and that this mapped area is not unserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (4) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

Submitter: KeyOn Communications

Comment: KeyOn Communications currently provides access at speeds of at least 768kbps downstream and at least 200kbps upstream to more than 50% of the homes in the designated area.

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for
last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second ("mbps") downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

Submitter: Taylor Telephone Cooperative, Inc.

Comment: The proposed funded services area of Flat Wireless located in Hawley, TX, does not meet the criteria for an underserved area because Taylor Telephone Cooperative provides up to 6 Meg service in 90% of the PFSA. Although Taylor does not cover the entire PFSA the 1149 premises disqualifies the entire area due to a 40% penetration of broadband services.

-----Service Area: Seymour

Submitter: KeyOn Communications

Comment: KeyOn Communications currently provides access at speeds of at least 768kbps downstream and at least 200kbps upstream to more than 50% of the homes in the designated area.

Submitter: windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency
officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

-----Service Area: Electra

Submitter: KeyOn Communications

Comment: KeyOn Communications currently provides access at speeds of at least 768kbps downstream and at least 200kbps upstream to more than 50% of the homes in the designated area.
Submitter: Electra Telephone Co.

Comment: Electra Telephone Company demonstrates that the area Flat Wireless LLC proposes to serve which overlaps Electra Telephone’s service area does not meet all of the criteria which categorize an area as underserved.

As demonstrated, 100% of households in Electra Telephone’s service area, including those areas which are part of Applicant’s proposed funded service area, are able to readily subscribe upon request to facilities-based, terrestrial broadband services at a minimum transmission speed of greater than 768 kbps downstream and 200 kbps upstream from Electra Telephone and, therefore, no part of this overlapping area is underserved on the basis of access to broadband service. In addition, Electra Telephone demonstrates that the rate of broadband subscribship for households in its service area is significant.

Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink and its competitors already offer robust broadband service within the mapped area of the applicant’s proposed funded service area and that this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) a summary of the vendor and methodology used for estimating competitive-service subscribers in the mapped area; (4) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (5) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----Service Area: Seminole

Submitter: US Cable of Coastal-Texas, L.P.

Comment: US Cable of Coastal-Texas, L.P. provides high speed broadband internet service in communities that are within the applicant’s proposed service area.
Submitter: Poka Lambro Telephone Cooperative, Inc.

Comment: Poka Lambro is a member-owned provider and has been providing quality telecommunications services within the proposed funding area since 1950. Poka Lambro currently provides both terrestrial and wireless broadband service that is ubiquitous throughout its service area.

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed
funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects

-----Service Area: Vernon

Submitter: KeyOn Communications

Comment: KeyOn Communications currently provides access at speeds of at least 768kbps downstream and at least 200kbps upstream to more than 50% of the homes in the designated area.

Submitter: Santa Rosa Telephone Cooperative, Inc.

Comment: Santa Rosa Telephone Cooperative, Inc. provides comments on this application regarding the underserved designation of the proposed funded area.

Submitter: Suddenlink Communications

Comment: Suddenlink already offers robust broadband service within the mapped area of the applicant’s proposed funded service area and we are confident this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (4) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.
-----Service Area: Coleman

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

Submitter: Coleman County Telecommunications
Comment: Coleman County Telecom Ltd. and Coleman County Telephone Cooperative in the proposed funded service area of Flat Wireless located in Coleman, TX. Because both companies provide 100% access to households for broadband, the PFSA does not meet the criteria for underserved area. Coleman County Telecom Ltd. provides 3 Meg service in approximately 90% of the PFSA.

-----Service Area: Dumas

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Discounted bundles and promotional pricing are also available.

-----Service Area: San Saba

Submitter: Central Texas Telephone Cooperative, Inc.

Comment: Central Texas Telephone Cooperative, Inc. (Central Texas) is an incumbent broadband provider in San Saba County, TX, an area covered by Flat Wireless’ San Saba broadband stimulus application. Central Texas provides universal broadband coverage to 100% of its potential subscribers in the county, and it provides broadband service to 54.8% of those potential subscribers. Central Texas has consistently and effectively advertised the availability of broadband Internet access at speeds of 3 Mbs and higher.

-----Service Area: Fort Stockton

Submitter: Big Bend Telephone Co.

Comment: Big Bend Telephone Company, Inc. is an ILEC currently providing terrestrial broadband data service within portions of the proposed funding area. Big Bend Telephone has served this area as the provider of last resort since 1960 and currently provides broadband
service throughout 100% of its rural service territory.

-----Service Area: Lubbock

Submitter: KeyOn Communications

Comment: KeyOn Communications currently provides access at speeds of at least 768kbps downstream and at least 200kbps upstream to more than 50% of the homes in the designated area.

Submitter: NTS Telephone Company, LLC

Comment: NTS Telephone Company LLC is providing Broadband Services, beginning at 8 mbps download speed to the residents in the community of Smyer, TX via a Fiber to the User network. The United States Department of Agriculture, Rural Utilities Service funded the overbuild of this community under RUS Broadband Loan TX 1112-A.

Submitter: Poka Lambro Telephone Cooperative, Inc.

Comment: Poka Lambro is a member-owned provider and has been providing quality telecommunications services within the proposed funding area since 1950. Poka Lambro currently provides both terrestrial and wireless broadband service that is ubiquitous throughout its service area.

Submitter: South Plains Telephone Cooperative

Comment: South Plains Telephone Cooperative serves the County Line, Merrell and Woodrow exchanges, portions of which are included in the proposed funded service area of Flat Wireless. Because the Cooperative provides access to broadband service to 100% of households and businesses throughout the exchanges, it exceeds 50% of broadband availability to households and businesses and therefore the area does not meet the criteria for underserved.
Submitter: windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

Submitter: Suddenlink Communications
**Comment:** This response conclusively demonstrates that Suddenlink and its competitors already offer robust broadband service within the mapped area of the applicant’s proposed funded service area and that this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) a summary of the vendor and methodology used for estimating competitive-service subscribers in the mapped area; (4) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (5) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----Service Area: McCamey

**Submitter:** Big Bend Telephone Co.

**Comment:** Big Bend Telephone Company, Inc. is an ILEC currently providing terrestrial broadband data service within portions of the proposed funding area. Big Bend Telephone has served this area as the provider of last resort since 1960 and currently provides broadband service throughout 100% of its rural service territory.

-----Service Area: Crosbyton

**Submitter:** KeyOn Communications

**Comment:** KeyOn Communications currently provides access at speeds of at least 768kbps downstream and at least 200kbps upstream to more than 50% of the homes in the designated area.

**Submitter:** Windstream
Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “underserved area” as follows: “Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects—Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second (“mbps”) downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

Submitter: South Plains Telephone Cooperative

Comment: South Plains Telephone Cooperative serves the Acuff, Caprock, Cone, and McAdoo exchanges that are included in the Flat Wireless proposed area. Because the Cooperative provides access to broadband services to 100% of customers throughout these exchanges, it exceeds 50% of
broadband availability to households or businesses and therefore the area does not meet the criteria for underserved.

-----Service Area: Childress

Submitter: KeyOn Communications
Comment: KeyOn Communications currently provides access at speeds of at least 768kbps downstream and at least 200kbps upstream to more than 50% of the homes in the designated area.

Submitter: AMA TechTel
Comment: As a Texas service provider serving many rural communities including Clarendon and Hedley Texas for which funds are being requested in this application, we are filing comments to give the determining authority complete information so that they can accurately distribute funds to those areas that are either unserved or underserved as required by the NOFA.

Submitter: windstream
Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

Submitter: Suddenlink Communications

Comment: Suddenlink already offers robust broadband service within the mapped area of the applicant’s proposed funded service area and we are confident this mapped area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (4) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----Service Area: Monahans

Submitter: windstream
Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to some of the households in the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as underserved.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects.”

-----Service Area: Olton

Submitter: South Plains Telephone Cooperative
Comment: South Plains Telephone Cooperative serves the Olton area exchanges of Edmonson and Halfway, a portion of which is included in the proposed funded service area of Flat Wireless. Because the Cooperative provides access to broadband service to all households throughout their two exchanges in the area, it exceeds 50% of availability to households and therefore the area does not meet the criteria for underserved.

-----Service Area: San Angelo

Submitter: Allegiance Communications, LLC

Comment: Allegiance Communications (Allegiance) currently provides a wide array of broadband offerings within the proposed funded service area. Allegiance has offered broadband services in excess of the 3 MB bandwidth requirement as set forth in the ARRA, NOFA and BIP/BTOP guidelines, all prior to the ARRA approval. Allegiance’s service area already provides for “sufficient access to broadband service to facilitate rural economic development”, as well as allows for choice of service providers through competing with Local Exchange Carriers, and allows for leasing of services through our own facilities. Allegiance’s opinion of the proposed funded service area is that of excess spending where funds could be better used in other portions of the country to deploy broadband service in accordance with the ARRA, NOFA and BIP/BTOP programs. Through funding the proposed service area, excessive competition will be created for all, which may create a short term economic boost, but have severe long term ramifications which may force service providers out of business.

Submitter: Texas Communications

Comment: Texas Communications provides Broadband wireless service to over 60 households and businesses in the San Angelo, Miles, Orient, TX area and have provided service for over 5 years. All of the customers are capable of receiving transmission speeds of at least 3Mbps in either direction. Texas Communications is one of at least 3 existing Wireless Broadband

-----Service Area: Crane

Submitter: Suddenlink Communications
Comment: This response conclusively demonstrates that Suddenlink and its competitors already offer robust broadband service within the mapped area of the applicant’s proposed funded service area and that this area is neither unserved nor underserved. Additional information is provided in the uploaded document, including (1) sample marketing materials; (2) a guide to how to read the data strings entered in the “Existing Broadband Subscribers” section of this response; (3) a signed vendor affidavit re: the methodology used for estimating total broadband subscribers in a proposed/mapped area; (4) a summary of concerns with the response process; (5) additional detailed data that may be of use to the federal agency or agencies reviewing this response; and (6) Suddenlink contact information, should one or more federal agencies have questions or require additional information.

-----Service Area: Quanah

Submitter: KeyOn Communications

Comment: KeyOn Communications currently provides access at speeds of at least 768kbps downstream and at least 200kbps upstream to more than 50% of the homes in the designated area.

Submitter: Suddenlink Communications

Comment: This response conclusively demonstrates that Suddenlink already offers broadband service within the mapped area of the applicant’s proposed funded service area and that this mapped area is not unserved. Additional information is provided in the uploaded document, including (1) sample marketing material; (2) a guide on how to read the data we entered in the “Existing Broadband Subscribers” section of this response; (3) Suddenlink contact information, should one or more federal agencies have questions or require additional information; and (4) a summary of concerns with the response process and the limitations that process has placed on our ability to provide NTIA/RUS with relevant, timely data.

-----Service Area: Presidio

Submitter: Big Bend Telephone Co.

Comment: Big Bend Telephone Company, Inc. is an ILEC currently providing terrestrial broadband
data service within portions of the proposed funding area. Big Bend Telephone has served this area as the provider of last resort since 1960 and currently provides broadband service throughout 100% of its rural service territory.

Submitter: Mountain Zone TV Systems

Comment: Mountain Zone TV Systems has been serving the Big Bend and Far West Texas since 1954. We offer Cable and Wireless Broadband with download speeds of 3 Mbps as well as TV Cable. The Broadband service began in 2004. As a local business we know our customers and are committed to supporting them. The infrastructure and qualified personnel are in place for expanding the broadband service beyond the areas in question, and increasing performance in all areas.

-----Service Area: Hereford

Submitter: Yucca Telecommunications, Inc.

Comment: Yucca Telecommunications provides data services utilizing DSL and Fiber-to-the-Premise technology in the town of Texico in Curry County. Yucca offers a "High Speed" service with up to 6 Mbps download and 2 Mbps upload. Yucca recently implemented the High Speed service due to the implementation of the FTTP network. Yucca is a wholly owned subsidiary of Roosevelt County Rural Telephone Cooperative, which is the incumbent telecommunications provider for Texico and a current RUS borrower.

Submitter: Windstream

Comment: Windstream’s data strongly suggest that the proposed funded service area likely does not qualify as an unserved area. Windstream offers facilities-based, terrestrial broadband service at advertised speeds of greater than 768 kbps downstream and 200 kbps upstream to some of the households within the proposed funded service area, and such households can readily subscribe to Windstream’s broadband service upon request. Windstream also has reason to believe that competitive broadband offerings are available in exchanges overlapping the proposed funded service area. Given this information, agency officials should further investigate existing broadband offerings within the proposed funded service area, so that officials can be sure that the area, in fact, qualifies as unserved.
Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than $200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an “unserved area” as follows: “Unserved area means a proposed funded service area, composed of one or more contiguous census blocks, where at least 90 percent of households in the proposed funded service area lack access to facilities-based, terrestrial broadband service, either fixed or mobile, at the minimum broadband transmission speed (set forth in the definition of broadband above). A household has access to broadband service if the household can readily subscribe to that service upon request.”

Submitter: ENMR Telephone Cooperative, Inc.

Comment: ENMR currently serves western Parmer county with DSL as part of its telephone service area.
