

Broadband USA Applications Database

Applicant Name: @Link Services LLC

Public Notice Submissions

-----**Service Area:** ATLINK - GRADY CTY

Submitter: Pioneer Telephone Cooperative

Comment: Pioneer Telephone Cooperative, Inc. through its subsidiary Pioneer Long Distance, Inc. (PLDI), has been offering broadband speed data service to subscribers for over 10 years. The area applied for by the ARRA applicant, which falls within the telephone exchange boundary is served with high speed internet broadband service.

-----**Service Area:** ATLINK - CANADIAN CTY

Submitter: Cox Communications Inc

Comment: Cox Communications, Inc.(Cox) is a broadband communications and entertainment company, providing advanced digital video, Internet, telephone and wireless services over its nationwide IP network. The third-largest U.S. cable TV company, Cox serves over 6.2 million residences and businesses.

Cox operates in hundreds of communities in 18 states and has invested over \$16 billion in private capital in its network over the last ten years. Cox provides its customers in Oklahoma with 21st century infrastructure that provides advanced broadband, video and telephone services. More than 99.5 percent of the households in our service areas have access to Cox high-speed Internet, at some of the fastest broadband speeds available in the nation.

Cox supports the goals of the American Recovery and Reinvestment Act to extend broadband to parts of the country that are unserved or underserved. We appreciate the efforts of the Rural Utilities Service and the National Telecommunications and Information Administration in making sure that the limited

amount of broadband stimulus funding available under the ARRA is targeted toward those consumers in greatest need, rather than to areas that already have access to broadband service.

To assist your agencies in ensuring that ARRA funds are directed to truly unserved and underserved areas, Cox is providing supplemental information that demonstrates, for the above-referenced application, the following: the location of Cox's broadband infrastructure; broadband service levels provided; number of customers served; pricing for each service tier; and marketing materials which demonstrate service availability. Consistent with the statutory requirement to expend funds only for projects in eligible areas, we trust that your agencies will use this information -- along with information from other broadband providers -- to obtain a clear picture of service availability in the area covered by the application. We encourage the use of independent due diligence to determine the extent of other broadband service offerings in the proposed funded service area covered by this submission, if other providers fail to submit information prior to the submission deadline.

We request that this data be treated as confidential and proprietary. Much of the information provided with this letter constitutes trade secrets or commercial information that is privileged and confidential and therefore exempt from public disclosure under 5 U.S.C. § 552(b)(4). Cox does not disclose this information to the public, and release of this information could cause competitive harm, by enabling other broadband providers to tailor their business strategies to unfairly compete with Cox.

Thank you for the opportunity to submit this information. We trust that it will be helpful in your analysis, and will inform your final decision concerning the application.

Thank you for the opportunity to submit this information. We trust that it will be helpful in your analysis, and will inform your final decision concerning the application.

Submitter: Windstream

Comment: Windstream's data conclusively establish that the proposed funded service area does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to households in the proposed funded service area, and such households can readily subscribe to Windstream's broadband service upon request. Data regarding these broadband offerings, detailed below, establish that the proposed funded service area cannot meet all of the three prongs of the "underserved area" test.

Windstream is a communications and entertainment company with more than 1 million broadband customers in 16 states. Investing more than \$200 million in broadband deployment over the last several years, Windstream now offers approximately 89% of its 3 million voice customers access to quality and affordable broadband service.

The agencies define an "underserved area" as follows: "Underserved area means a proposed funded service area, composed of one or more contiguous census blocks meeting certain criteria that measure the availability of broadband service and the level of advertised broadband speeds. These criteria conform to the two distinct components of the Broadband Infrastructure category of eligible projects- Last Mile and Middle Mile. Specifically, a proposed funded service area may qualify as underserved for last mile projects if at least one of the following factors is met, though the presumption will be that more than one factor is present: 1. No more than 50 percent of the households in the proposed funded service area have access to facilities-based, terrestrial broadband service at greater than the minimum broadband transmission speed (set forth in the definition of broadband above); 2. No fixed or mobile broadband service provider advertises broadband transmission speeds of at least three megabits per second ("mbps") downstream in the proposed funded service area; or 3. The rate of broadband subscribership for the proposed funded service area is 40 percent of households or less. A proposed funded service area may qualify as underserved for Middle Mile projects if one interconnection point terminates in a proposed funded service area that qualifies as unserved or underserved for Last Mile projects."

-----**Service Area:** ATLINK - McCLAIN CTY

Submitter: Pioneer Telephone Cooperative

Comment: Pioneer Telephone Cooperative, Inc. through its subsidiary Pioneer Long Distance, Inc. (PLDI), has been offering broadband speed data service to subscribers for over 10 years. The area applied for by the ARRA applicant, which falls within the telephone exchange boundary is served with high speed internet broadband service.

Submitter: Windstream

Comment: Windstream's data conclusively establish that the proposed funded service area does not qualify as an underserved area. Windstream offers facilities-based, terrestrial broadband service (meeting the definition set forth in the Notice of Funds Availability) to households in the proposed funded service area, and such households can readily subscribe to Windstream's broadband service upon request. Data regarding these broadband offerings, detailed below, establish that the proposed funded service area cannot meet all of the three prongs of the "underserved area" test.
