Applicant Name: Faith in Action Community Connection
Project Title: Seniors and Juniors Computer Lab
Project Type: Public Computer Center

Executive Summary

The project would develop a high speed broadband internet access computer center with 20 computer stations, classes in computer use, website development, etc. for older adults, and other resources for educating older adults in computer use. The center would employ a technical aide and would also be used by the YMCA preschool for classes and activities. It would also be available to the families of center participants during determined hours, to allow for the safety of children in the facility during business hours.
