Applicant Name: DUPAGE HOUSING AUTHORITY

Project Title: Round 2 Grant Guidance - Public Computer Centers

Project Type: Comprehensive Community Infrastructure

Executive Summary

The proposed service will improve the quality of lives of more than 100 senior citizens by enabling them to expand their boundaries of knowledge via Internet access. We are aware of the impact of digital divide on the race and gender categories, but we seldom pay attention to the senior citizen group, who also deserves society's philanthropic attention. The proposed service will help mainly help senior citizens. We expect all the 100-plus residents of the facility will take advantage of this program. Most of the users possess high school and above education. The project will provide one part time contractual job. It will also generate sales of up 80 personal computers, a few routers, and other peripheral products. We anticipate this project will require about $300,000 to implement.
