Applicant Name: 3H ENTERPRISES

Project Title: We will purchase an existing FM Station and construct a broadband Internet web site.

Project Type: Sustainable Broadband Adoption

_______________________ Executive Summary _______________________

This project is to buy an existing signal, create a FM radio station with (broadband Internet) access (Wimax) in conjunction with a rural area of Texas (Karnes City). We will move the transmitter to allow for middle mile adjacent to San Antonio. The coverage area is important to the emergency accessability and congruency of each city. We will provide upon completion of this project Social, political and entertainment news, and host events that are meaningful to the listeners within our area. We will provide the same on our web site. Giving information were prevalent, about jobs new businesses in the area, and other information as obtained and inspected for content. This is to not bring discrimination of any type to all listeners.
