The Public Housing Administration will enhance educational opportunities, job placement, business development and business marketing opportunities for some 60,000 low income citizens, of which 44.8% live below poverty level and face a 14.9% unemployment rate. This will be attained by improving the physical and technological infrastructure of its 122 Educational Technology Centers, thus promoting residents access to computer equipment, technology training, educational services and free high speed Internet access. A large majority of the residents in the Public Housing areas, are unemployed and will be able to seek employment through the Internet. Students who attend the schools near to the project, who wish to avail themselves of distance education and video conference training will be able to do so through the Center's equipment and WiFi facility. Those who have computers but do not have the resources for high speed internet will be able to access the WWW at the Centers. The geographical areas impacted include: Aguadilla, Aguada, Bayamon, San Juan, San Sebatian, Arecibo,Cayey, Salinas, Rio Grande, Ceiba, Vega Alta, Caguas, Juncos, Mayaguez, Catano, San German, Utuado, Ponce, Guaynabo, Vieques, Sabana Grande, Hato Rey, Moca, Aibonito, Carolina, Toa Alta, Comerio, Humacao, Patillas, Yauco, Dorado, Toa Baja, Naguabo, San Lorenzo, Fajardo, Hormigueros and Manati. The Project will also promote and avail many of the its services and information via the Internet making it easier for residents to access the administration's services. The areas served by the project include it's nine hundred eleven families, which constitutes approximately 80% of the 60,000 residents of the Public Housing Project. The PHA of Puerto Rico projects that approximately 75%-80% of the population will avail themselves of the Center's services or from the high speed access. Currently the PHA successfully administers funds for Housing and Urban Development totaling close to $542,000,000. In addition it administers an E-Rate grant totaling close to 15M which has provided the resources for the existing Internet services and Educational Centers. It is expected that approximately 200 jobs will be saved by projecting the number of personnel at each one of the Centers in addition to the educational support staff to be hired from these 100 are new and 50 are saved.
