Broadband USA Applications Database

Applicant Name: PINNY CLUB

Project Title: Pinny Club Internet Site

Project Type: Public Computer Center

Executive Summary

This project will allow a vast majority of rural citizen's access to high speed internet. Currently the local library is the only alternative for users; they only offer six computers and are closed on Mondays and Fridays. We are proposing adding an additional space of 25' x 45' to house 10 computers with high speed internet access. There will also be the availability of Wi-Fi for those users wishing to use their own devices. We will also provide computer training, internet training and general software training. The target area for these services is rural users who currently cannot get internet access. As administrator of this grant I am a certified teacher who currently manages our technology lab. I foresee with this grant, the ability to allow many people to use our public high speed internet for school work, job training, social networking, pc/software training, resumes, research and other networking task. This grant will allow 3-4 current employees access to more work opportunities, training and possible career advancement. This project has an overall cost of 361396.95 For a 36 month period.
