Note: In order to receive SRF funding for efforts prior to the auction, this federal entity has agreed that it will provide (I) to the fullest extent possible, for sharing and coordination of eligible frequencies with non-Federal users, including reasonable accommodation by the eligible Federal entity for the use of eligible frequencies by non-Federal users during the period that the entity is relocating its spectrum uses (in this clause referred to as the “transition period”); and (II) for non-Federal users to be able to use eligible frequencies during the transition period in geographic areas where the eligible Federal entity does not use such frequencies. Additionally, this eligible Federal entity will, during the transition period, make itself available for negotiation and discussion with non-Federal users not later than 30 days after a written request therefor; and during the transition period, make available to a non-Federal user with appropriate security clearances any classified information (as defined in section 798(b) of title 18) regarding the relocation process, on a need-to-know basis, to assist the non-Federal user in the relocation process with such eligible Federal entity or other eligible Federal entities. [47 U.S.C. § 928(d)(3)(B)(ii)]

System Name	Expanded Capability Cost (\$M)	Expanded Capability Description	Expanded Capability Justification
AF ACTS			AF-7 Air Combat Training Systems (ACTS) requires an extension from 63 to 120 months to complete all system and operational phases of the program. (See Revision 7 Note)
AF AMT 1			Assumes 3 months from receipt of funds at the agency to receipt of funds at the program office.
AF AMT 2			Assumes 3 months from receipt of funds at the agency to receipt of funds at the program office. Rev 1 See note.
AF AMT 3			Assumes 3 months from receipt of funds at the agency to receipt of funds at the program office. Rev 1 See note.
AF AMT 4			Can operate in 1780 to 1850 MHz, no funding required
AF Classified System			
AF Cost and Accounting (AFCAA)			All pre-Auction funds expended for AFCA support. Assumes 3 months from receipt of funds at the agency to receipt of funds at the program office.
AF Other 1			Can operate in 1780 to 1850 MHz, no funding required
AF Other 2			Sharing on a non-interfering basis, no funding required
AF Other 3			Can operate in 1780 to 1850 MHz, no funding required
AF Overhead and Implementation (AFSMO)			Additional AFSMO (HQ) Space Division, Staff Engineers, Reporting, Assigners, Analysis, and Staff Support required for facilitating, reporting, regulatory, planning and travel. Assumes 3 months from receipt of funds at the agency to receipt of funds at the program office.
AF Robotics 1			Extension of spending timeline required to return unused SRF funds
AF Robotics 2			Assumes 3 months from receipt of funds at the agency to receipt of funds at the program office.
AF Robotics 3			Assumes 3 months from receipt of funds at the agency to receipt of funds at the program office.

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Interactions

Interaction Name	Interaction Description
1	<p>Spectrum Certification: This Transition Plan is based on the DoD Alternative Proposal for the 1755-1780 MHz band; details can be found in Plan Notes (Additional Information). As part of the Transition Plan, some systems will be modified to operate in both the 1780-1850 MHz and the 2025-2110 MHz bands, while other systems will be retuned or modified to operate in other federal bands. All modified equipment will be required to undergo the spectrum certification process through the NTIA Spectrum Planning Subcommittee (SPS) IAW OMB Circular A-11, Section 31.12(c). This certification is required before agencies can "submit estimates for the development or procurement of major radio spectrum-dependent communications-electronics systems". The spectrum certification process through the NTIA Spectrum Planning Subcommittee can require a number of months to complete for routine equipment developments. It is anticipated that due to the numerous simultaneous certification requests required to enable the modification and/or replacement of the systems identified in this and other agencies' Transition Plans, there will be a significant backlog within the SPS process. It should also be noted that the spectrum certification process is required at each stage of a program's development and thus some of the modified or relocated systems may be required to undergo the SPS review process multiple times. These interactions will begin soon after this Transition Plan is approved and will continue until all affected systems receive spectrum certification approval from the SPS.</p>
2	<p>Frequency Authorization: All systems that require either different frequency assignments in the 1780-1850 MHz band, modification to operate in both the 1780-1850 MHz and 2025-2110 MHz frequency bands, or relocation to operate in other federal bands will have to follow the frequency authorization process in order to obtain new frequency authorizations. It is understood that NTIA intends to essentially "reserve" frequency assignments in the alternate spectrum bands based on the data provided in this Transition Plan; however, the formal frequency authorization process through the NTIA Frequency Assignment Subcommittee (FAS) must still be completed at a future time, subsequent to the associated SPS certification process for the systems/equipment and prior to actual operations in the alternate bands and verification/validation of comparable technical capability. These interactions will begin soon after this Transition Plan is approved and will continue until all affected systems become operational in dual or alternate frequency bands as defined by the Transition Plan. DoD notes that, consistent with the CSMAC WG-4 Final Report (July 24, 2013), existing DoD TRR operations will continue in the 1755-1780 MHz band in regions where there is little or no commercial broadband deployment in this band.</p>
3	<p>Federal Communications Commission (FCC) band allocation rules development and adoption. The allocation for and use of this band by non-federal fixed and mobile users will require the development of specific technical rules governing non-federal operations, such that sharing of the band between federal and non-federal users is feasible and jointly successful. The development of these rules will be critical to the successful implementation of the DoD Alternative Proposal and the associated transition of systems addressed in this plan from the band. These rules must be adopted prior to the auction of the 1755-1780 MHz band such that potential licensees are fully aware of the requirements that they must comply with to begin operations in the band.</p>

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Interactions

Interaction Name	Interaction Description
4	Development of Coordination Guidelines For Federal Agencies and Industry: Given the fact that most federal operations will still be in the band upon the award of licenses by the FCC and some federal operations will continue indefinitely in the band, specific coordination guidelines must be developed and published by NTIA (for federal agencies) and the FCC (for non-federal licensees). The formal development of these coordination procedures has not yet begun by NTIA and the FCC, but they will be essential to any early entry by non-federal licensees.
5	National Telecommunications and Information Administration (NTIA) band allocation rules (2025-2110 MHz) development and adoption. The allocation for and use of the 2025-2110 MHz band by federal fixed and mobile users will require the development of specific technical rules governing federal operations, such that sharing of the band between federal and non-federal users is feasible and jointly successful. The development of these rules will be critical to the successful implementation of the DoD Alternative Proposal and the associated transition of systems addressed in this plan from the band. These rules must be adopted prior to the auction of the 1755-1780 MHz band such that federal agencies are fully aware of the requirements that they must comply with to begin operations in the 2025-2110 MHz band.

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Impact Factors

Factor Name	Factor Description
Alternate Assignments	Alternate assignments for displaced systems requiring continued spectrum access must be granted.
Availability of Frequency Assignment Authorizations	The AF Transition Plan is based heavily on the DoD Alternative Proposal and its success is critically dependent on the interaction of a number of interdependent elements including those activities of other federal agencies (e.g. DOJ Transition Plan). A number of these elements involve either replacing or modifying systems that will operate in alternate frequency bands. There will be a very large number of new frequency authorizations required in order to support the new operations. New authorizations must be in place prior to existing operations or authorizations being able to be terminated in the 1755-1780 MHz band. Given the large number of new frequency proposals that must be worked through the process and completed, there is concern that all necessary actions cannot be completed in time to ensure no loss of critical capabilities.
Environmental Impacts	This transition plan is dependent on the installation of new equipment at AMT, P5 ACTS, and other outdoor USAF installations which could be delayed due to extensive inclement winter (cold) and summer (extreme heat index) weather conditions as well as natural disaster such as earthquakes, hurricanes, floods, forest fires, etc. Extensive delays as a result of these catastrophic events will impact the ability of a range to complete its installation on the timelines submitted in this Plan. Delays for weather or catastrophic events have not been accounted for in this timeline analysis as noted in Tab D. An environmental impact statement (IAW NEPA) may be required by state and federal authorities for any AMT, P5 ACTS, or other site development. This process can take significant time and effort/costs to prepare and coordinate before any site preparation can be accomplished.
Frequency Coordination-1	*****
Frequency Coordination-2	Any non-Federal use of the 1755-1780 MHz band, in areas and frequencies designated for coordination, must be coordinated with incumbent DOD users through the DOD Coordination Portal using applicable coordination procedures. Use will not be permitted until such coordination is successfully completed or until the frequency assignment is discontinued in the applicable frequencies and areas.
General Funding-1	Successful transition in this frequency range will require a common means to exchange technical information and analysis results. DISA DSO plans to develop a portal for this exchange and has submitted a transition plan that contains the cost of \$24.5M to develop and sustain this portal. If DISA DSO's transition plan is not approved, then each Service may require additional funds, which is not currently captured within the Services' transition plans for development and sustainment of a portal. Therefore, if divided equally, the estimated additional cost each Service will need to include within its transition plans will be \$8.17M, based on DISA DSO's original, total cost submission.

Releasable

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Impact Factors

Factor Name	Factor Description
General Funding-2	Furthermore, the successful implementation of the DoD Alternative Plan requires access to the frequency range 2025 - 2110 MHz which will require coordination with current incumbents. DISA DSO plans to develop a portal, with an analysis capability included, for this coordination and has submitted a transition plan that contains the cost of approximately \$42.8M to develop and sustain a coordination portal. If DISA DSO's transition plan is not approved, then each Service may require additional funds, which is not currently captured within the Services' transition plans for development and sustainment of a portal. Therefore, if divided equally, the estimated additional cost each Service will need to include within its transition plans will be \$14.27M, based on DISA DSO's original, total cost submission.
General Funding-3	Auction funds are necessary for implementing new technological capabilities to relocate into alternative frequency band.
Licensee Coordination with DoD Organizations	To preclude any misunderstanding or misinterpretation, potential licensees must be advised that the DoD will provide direction to the military Services and other defense agencies to refer all requests for spectrum relocation information initiated by commercial wireless providers or their agents to the DoD CIO, Spectrum Policy and Program Directorate. The DoD CIO will establish a single focal point that will be responsible for establishing and overseeing procedures to facilitate information exchange between the DoD and wireless licensees.
Sensitive Information that is not releasable to the public is included in the Transition Plan	In accordance with 47 USC 929 - National Security and Other Sensitive Information, the Service Secretary has determined that public release of the information marked as sensitive/FOUO, taken in the aggregate as presented in this TP would reveal sensitive national security information. Withholding the sensitive information has no impact on fulfillment of this transition plan as the protection areas already identified are inclusive.
Technology Development-1	*****
Technology Development-2	The AF capability for RQ-11B Raven and RQ-20A Puma is based on Army SUAS research and development efforts. If that effort is delayed, there will be a corresponding impact to AFSOC SUAS transition planning.
Technology Development-3	The AF capability for RQ-12A Wasp-AE is based on Navy SUAS research and development efforts. If that effort is delayed, there will be a corresponding impact to AFSOC SUAS transition planning.

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Impact Factors

Factor Name	Factor Description
Technology Development-4	The necessary AF developmental technologies for C2 and Tactical ROVERs will progress as expected. Any RDT&E delay will result in a corresponding impact to AF ROVER transition planning.
Timeline Conditions for Coordination	The coordination process that wireless licensees will be required to follow includes the DoD requirement to perform associated analyses of potential interference from wireless licensee build-out plans. The DoD will, by necessity, be required to respond to numerous industry coordination requests on specific timelines. This coordination effort will be conducted through a DoD web-based portal capability, which will require time to develop and implement. Given that SRF funding to initiate the development of the DoD portal will not be available until months after the auction and award of licenses, a full coordination capability will not be in operation until early 2016, at the earliest. The timeline noted in Tab D assumes a baseline of 3 months from the close of the auction to the receipt of funds, and an estimated 9 months for portal development. A full coordination capability is projected for early 2016, at the earliest. Additional time past the 12 months reflects requirements to implement transition objectives.
Timeline Conditions for Receipt of Funds	All timelines in this plan are based on the assumption that funding will be received by DoD three months after the close of the auction. Should the receipt of funds change, timelines may need to be adjusted accordingly.

Releasable

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
1	Frequencies Tab, the "N/A" denotes that no value was listed in the frequency assignment.
10	*****
11	Some Air Force serial number entries are identified as "Vacate With Temp". As defined in the 1755-1780 MHz Band NTIA Transition Plan Guide dated 22 November 2013, "Vacate with Temp" means that the assignment will ultimately be vacated but temporary geographic frequency sharing will be allowed for some period of time during the relocation based on coordination and a negotiated sharing arrangement. The concept of "temporary sharing" is subject to several conditions. These include: the requirement for the 1755-1780 MHz Early Entry Portal to be operational to handle coordination requests; coordination requests will be addressed on a site-by-site basis and sharing conditions shall be approved by the Military test range facility affected; sharing considerations will be assessed based on industry build-out/deployment plans and incumbent DoD operations; and a recognition that industry be aware that sharing may be assessed as not feasible for an extended period of time. Industry should not assume that a "Vacate With Temp" indicates that sharing for that frequency assignment is assured. The label only means that DoD is agreeable to determine if sharing is feasible in response to individual industry coordination requests.
12	Timeline Tab, the number provided in the "Temporary Sharing" column denotes the months after the award of licenses by the FCC (i.e., start of the transition period), when the agency will begin coordination with auction winners to allow for temporary geographic sharing pursuant to an applicable sharing coordination process.
13	*****
14	*****
15	*****
16	Frequencies Tab, the value provided in the Authorized Area of Operation column cannot be equated to the impacted area or required protection distances.
17	This Transition Plan, as well as the key assumptions for those programs which it addresses, is based on the July 2013 DoD Alternative Proposal for the 1755-1780 MHz band. The DoD alternative proposal constitutes a workable balance to provide unencumbered access to the 1755-1780 MHz band most desired by the commercial wireless industry while ensuring no loss of critical Federal capabilities. The DoD Alternative Proposal is comprised of the following elements which are highly interdependent and must be implemented as a collective set in order to successfully maximize industry access to the 1755-1780 MHz band. In addition, the individual elements will require funding and time to execute:

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
17-1	<p>1. DoD will modify selected systems to operate in both the 1780- 1850 MHz and the 2025-2110 MHz bands. This element is dependent on a change being accomplished to the US Table of Frequency Allocations to incorporate FIXED and MOBILE Federal use on a primary basis with associated amplifying footnotes that have been coordinated with the FCC. The selected systems that will be modified to operate in both the 1780-1850 MHz and the 2025-2110 MHz bands include:</p> <ul style="list-style-type: none"> • Small Unmanned Aerial Systems (SUAS) • Tactical Targeting Network Technology (TTNT) • Tactical Radio Relay (TRR) • High Resolution Video systems (HRV)
17-10	<p>2. DoD will modify selected systems to operate in other existing Federal bands as identified in its September 2011 Feasibility Study:</p> <ul style="list-style-type: none"> • Precision Guided Munitions (PGMs) to 1435- 1525 MHz • Point-to-Point Microwave Links to 7125-8500 MHz • DoD Video Surveillance/Robotics to 4400-4940 MHz
17-11	<p>3. DoD systems will continue operations in the 1755-1780 MHz band on a shared basis with commercial users as follows:</p> <ul style="list-style-type: none"> • Satellite Operations (SatOps) will remain in the 1755-1780 MHz band as commercial broadband operations will be required to accept interference from SatOps. • Electronic Warfare (EW) (on a non-interference basis) • Air Combat Training System (ACTS) (where required). DoD will, over time, make adjustments to the current ACTS frequency assignments that exist throughout the 1755-1850 MHz band such that those assignments in use in proximity to metropolitan areas and high-value industry market areas will all be above 1780 MHz and as many as possible of those remaining in the 1755-1780 MHz band will be limited to very rural and remote areas where licensees are not expected to plan to build out LTE networks in this band. • Joint Tactical Radio System (JTRS) at six key sites identified in the DoD Feasibility Study.
17-12	4. DoD will plan to compress the remaining operations into the 1780 - 1850 MHz band.
17-13	5. DoD will consequently not require access to the 5150-5250 MHz band, thus allowing the FCC to modify its current rules to expand the use of unlicensed mobile broadband devices in this band.
18	AF 103102, AF 103103, AF 103104, and AF 122767: These assignments do not conform to the table of allocations, and operate under NIB status. Operations pose a very limited interference impact.

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
21	*****
22	*****
23	Below is the explanation for the AMT transition based on the following cost elements for each of its Test Ranges. These are noted in two segments: (1) Baseline which applies to each USAF Test Range, and (2) Installation specific elements.
23-1	The following are the Baseline cost elements for the USAF Test Ranges:
23-10	#1) Replace USAF Test Range AMT ground site receivers with new telemetry systems that provide a 2 to 3-fold increase in spectral efficiency.
23-11	*****
23-12	#3) Develop end-to-end system test procedures and perform the flight test between modified test aircraft with the modified TM Transmission Segment and modified AMT Receiver Systems.
23-13	#4) Upgrade the Scheduling and de-confliction software to identify the required mission bandwidth for the TM transmitter being scheduled and allow the software program to adjust the scheduled frequencies to maximize spectral efficiency to reduce the risk of cancelling missions due to inadequate available spectrum. This is a total cost estimate by the USAF and will be utilized at the USAF Test Ranges.
23-14	*****
23-15	*****
23-16	#7) An extension will be requested for AF 092532 and AF 092533
23-17	*****
23-18	The following is a list of site specific USAF Test Ranges:
23-19	Edwards AFB
23-2	#1) Procure and install multi-band, bandwidth-efficient telemetry transmit subsystems replacing the existing transmitters in selected aircraft used in flight test operations. This element also includes technical studies for development of the transmitter acquisition documentation, power dividers, multi-band antennas installation of the transmitters, T-2 Modification documentation packages, and spares.
23-20	*****
23-21	#3) Procure and integrate into the Edwards range three mobile/transportable telemetry vans to augment the existing fixed sites.
23-22	Eglin AFB
23-23	#1 Procure and install multi-band, bandwidth-efficient, telemetry transmitters replacing the existing transmitters in 40 aircraft used in flight test operations. This element also includes technical studies for development of the transmitter acquisition documentation, power dividers, installation of the transmitters, T-2 Modification documentation packages, and spares.

Releasable

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
23-24	#2) Procure and install Flight line uplink command and control function to each test aircraft to allow for changing the frequency and modulation of the test aircraft without having to remove the transmitter pallet from the aircraft. With the compressed band, there will be frequency changes to each test aircraft due to the high usage at Eglin. This modification will allow for rapid change of the frequency and modulation without the risk damage to the test aircraft and will minimize the number of aircraft inspections prior to each flight. This cost element includes the software and hardware to implement this function.
23-25	*****
23-26	#4) Procure and integrate into the Eglin's range three mobile/transportable telemetry vans to augment the existing fixed sites.
23-27	*****
23-28	#6) After the completion of the East Range installations and release of the 1755-1780 MHz to the 11 designated Major Market areas identified in #5 above, Eglin will initiate action on its West Range. This effort is estimated to complete approximately 120 months after auction and at this point, Eglin will relinquish the remaining 1755-1780 MHz portion of the band to the cell industry to gain use in the remaining Major Market areas affected by Eglin's TM operations. These markets include: Nashville, Memphis, Birmingham, Mobile, and New Orlean
23-29	Vandenberg AFB
23-3	*****
24	USAF ACTS: Transition Planning is based on the following cost elements for each of its Training sites and are noted below:
24-1	*****
24-10	#2 The ACTS compression will require major software modifications as well as new software to provide the system the ability to operate in all areas of the CONUS without impacting the Wireless Industry operations below 1780 MHz. The anticipated software efforts are described below: a) Software Modifications, b) Mission Line Up (MLU) Software Within Ground Subsystem (GS), c) Add Control of Frequency Assignments Based Upon Geographic Area, d) Advanced Data Interface Unit (ADIU) Software in Pod, e) Update to Process Multipoint Polygon Area for Frequency Management, f) Add Support for Dynamic Frequency Management for Autonomous Ops, g) Firewall (FW) Software Within GS, h) Provide Acknowledgements of Uplinks to Remote Slave Live Monitors, i) Display & Debriefing System Software in GS, j) Add Support for New Training Range Network Manager Software, k) Update to Filter Network Traffic Based Upon Geographic Area New Software, l) New Training Range Network Manager Software, and m) Provide Dynamic Frequency Management for Autonomous Instrumentation Pod Operations Across Large Geographic Areas

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
24-11	#3 The ACTS modification will be verified and validated through a formal test program which will include both ground and flight test. Formal test plans and procedures will be developed for the conduct of the test.
24-12	*****
24-13	*****
25	*****
26	Commercial coordination and demonstration of ability to accept/tolerate SATOPS interference should be required prior to deployment within earth station contours per CSMAC recommendations and AF Space Command/A3S input. DoD's plan includes a Spectrum Sharing Testing/Demo Program, during which tolerance to SATOPS interference will be evaluated. Results of this program may satisfy coordination requirements for commercial operations within some or all earth station contours.
27	Full funding is required prior to auction for two SATOPS RBC Non-Recurring Engineering activities and RBC Baseline Documentation and ECP/CCB/MCB work. These activities are scheduled to begin prior to and finish shortly after the auction, and full funding is required to prevent disruptions to work and ensure all other (post-auction) activities begin when planned. SMC also requires all RFI monitoring funding and 1780-1850 MHz band compression pre-coordination activities funding prior to auction.
28	SATOPS pre-auction funds are necessary to model interference probability surrounding federal earth stations in order to identify geographic boundaries for coordination requirements.
29	*****
3	Transmissions of federal SATOPS earth stations represent potential interference to commercial systems. The ability to conduct successful coordination prior to the installation of new commercial systems within the potential interference envelope of federal SATOPS earth stations will be required to implement this transition plan and share this spectrum, in accordance with CSMAC WG3 Report recommendations.
30	Adequate protection distances based on CSMAC analyses need to be established for all affected AF systems. Failure to establish such distances could hinder implementation of the transition plan.
31	Specific regulations are required to protect AMT/P5ACTS receivers from out-of-band emissions (OOBE) from commercial wireless systems. This protection should include the requirements as set forth by ITU-R Rec. M.1459. Additionally, a process must be developed and approved for immediate LTE commercial wireless systems shutdown if and when "rogue" interference occurs. If the commercial wireless systems experience interference from Federal operations, a process must be developed and approved for the resolution of this type of interference.
32	*****

Releasable

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
33	Successful sharing of this spectrum requires the protection of incumbent systems and the assurance of their continued primary status in the band. The FCC and NTIA must develop regulations to protect critical Air Force operations as new commercial wireless systems enter into this spectrum. Regulatory language must require commercial wireless licensees to accept interference from DoD SATOPS earth stations. Regulatory language must also include allowing flexibility for future growth/change in DoD/Federal space and ground segment equipment/locations consistent with CSMAC WG3 report recommendations 4.2.3-3, 4.2.3-4, 4.2.4-1, 4.2.4-3, 4.2.6-1, 4.2.6-2.
Rev 1	: Revision 1 incorporates changes in funds for two systems as follows: (1) Per DOD CIO Memo, Subject: Department of Defense 1755-1780 Transition Plan dated 31 May 2017 and OMB approval dated 27 Jul 2017, the costs for AF UAS-1 are increased by \$5.974 bringing the total to \$33.378M; and (2) Per DOD CIO Memo, Subject: Department of Defense 1755-1780 MHz Transition Plan Update dated 16 Nov 2017 and OMB approval dated 30 Nov 2017, AF AMT-2 and AF AMT-3 are reduced by \$1.685M and \$1.684M, bringing their totals to \$55.298M and \$55.299, respectively. The \$3.369M is added to DON AMT-4 to execute all responsibilities, including those in support of AF, related to modification of the Integrated Frequency Deconfliction System (IFDS).
Rev 3	This revision reflects changes to the spending timelines for AF Robotics 1 and AF Video 4. Frequency Assignment transition is already complete for both systems. AF Robotics 1 requires an extension from 15 to 32 months to process returning remaining SRF funds. AF Video 4 requires an extension from 15 to 72 months to allow new technology to be incorporated to enhance comparable capability due to changes to the planned transition.
Rev 4	This revision 4 reflects changes to the spending timelines for AF Robotics 1. AF Robotics 1 requires an extension from 32 to 48 months to correct the previous entry of 4/2018 in Rev 3 to 8/2019 to process returning remaining SRF funds.

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
Rev 5	<p>This revision 5 reflects changes to the spending timelines for AF UAS 1 – 4 and AF TT&C.</p> <p>1) UAS 1- 4 requires an extension from 51 to 59 months. Originally, AF UAS 1 – 4 programs were to be completed NLT 30 Nov 2019. This is no longer likely due to a delay in contract award (6 months slip) as well as an engineering manufacturing and development slip (-53 days slack). The combination of the two challenges moves our program completion out to July 2020. The program is making every attempt to accelerate schedule by working with DT&OT organizations to combine Test events.</p> <p>2) AF TT&C requires an extension from 51 to 96 months to complete all three phases of the program. Phase I of AFSCN Radio Frequency Monitoring System (ARMS) began, with first expenditure, in September 2018. Phase I's Critical Design Review will be completed and Technical Data Package delivered by 31 March 2020. Funding for this has already been obligated. Phase II of ARMS will begin by May 2020. In Phase II, purchase of COTS-based RFI monitoring, detection, analysis/identification and geolocation equipment along with communication system equipment will occur by May 2021. Phase II includes delivery of a central node consisting of a workstation, data storage, displays, communication interfaces, and routers at Schriever Air Force Base. Phase II requires \$2.6 M to be obligated in FY20. Phase III of ARMS will begin by May 2021. In Phase III, ARMS will be deployed to all US&P AFSCN locations, with completion by May 2023. Phase III requires \$2.2 M to be obligated in FY21 and \$2.2 M to be obligated in FY22.</p>
Rev 6	<p>Revision 6 reflects changes to the spending timeline for AF UAS 1. AF UAS-1 (HH-VDL) was originally scheduled to complete all transition tasks NLT 31 July 2020. Due to COVID-19 and travel restrictions, along with NSA delays, Contractor Qualification Testing (CQT) and Developmental Test & Evaluation (DT&E) delays, schedules have slipped by 6 months. The combination of unforeseen issues along with post development requirements to ensure proper functionality of the HH-VDL radio moves our program completion out to July 2021. The program is making every attempt to accelerate schedule by exploring alternative solutions to NSA issues and working with our Test organization to possibly combine events.</p>

DOD\AF 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
Rev 7	<p>Revision 7 reflects changes to the spending timelines for AF-7 (ACTS) and AF-5 (AF TT&C Support). The initial phase of AF-7 ACTS ACC/A3A operations began with the first FY19 funding request of \$3.6M followed by FY20 \$3.4M to establish communication networks between operational ranges and also supports ACTS program operations. Subsequent years through FY25 funds the network managers that monitor the communication systems and frequency networks between ACTS users. These networks are critical in supporting aircrew combat readiness while training with ACTS. The funds continue to support program operations, connectivity fees, as well as Advisory and Assistance Services (A&AS) support at our major training facilities.</p> <p>This includes the AF-7 ACTS AFLCMC/EBYC Spectrum Relocation software upgrade of vacating the 1755-1780 frequency includes automatic frequency control and management in addition to other software upgrades aimed at improving training range capabilities. Since CIO/AFSMO quarterly briefings began, the AF-7 team has expressed the need for funding execution authority through FY25 to ensure funds are available to support contract closeout and that this could take 5 years past program completion (originally slated for Sep '20.) Additionally, due to the complex nature of this software upgrade, we have run into programmatic delays and COVID-19 impacts that require extended time to finish remaining milestones and testing before the SW can be fielded. Thus, our office will be requiring a PoP extension to complete remaining program milestones. The AF-7 team also recently awarded an additional Delivery Order; the "Phase II" effort 31 March which includes additional equipment and updated/various trainings that support fielding of the Spectrum SW update.</p> <p>In summary, AF-7 requires an extension for funding execution through the end of FY25. The following funding schedule supports this extension request: \$3.5M FY 21; \$3.4M FY22; \$2.0M FY23; \$2.1M FY24; and \$2.2M FY25.</p> <p>AF-5 (TT&C Support) has the responsibility for AF-06 program oversight and support. AF TT&C (AF-06) was recently approved for an extension from 51 to 96 months through May 2023 to complete all three phases of their AFSCN Radio Frequency Monitoring System (ARMS) program. Therefore, AF TT&C Support (AF-05) is requesting a parallel extension through May 2023 to continue their support through the completion of the AF-06 ARMS project.</p>
